SAWO PLAYBOOK

Editor User Guide

How to create and maintain Standard Ops (SOPs), kanban cards, checklists, folders and training records.

This guide walks you through everything an **Editor** does in SAWO Playbook, step by step, with a screenshot for each screen. Use the contents page to jump straight to the task you need.

WRITTEN FOR	COVERS	EDITION
Editors	**SOPs · Kanbans · Checklists · Folders · Skills**	**October 2026**

About the screenshots

The screenshots come from a demo organisation with example users (Erin Editor, Riley Reviewer, Pat Approver, Sam Operator). Your organisation's menu, names and folders will differ, and your Admin may have switched some features on or off.

1 Getting started

What the Editor role is for, how to sign in, and how the screen is laid out.

1.1 What an Editor can do

Editors **write and maintain** content. You create SOPs and kanban cards and send them for approval. Approvers check your work and publish it. Your Admin can change role permissions, so your account may have a few more or fewer options than listed here.

TASK	EDITOR
View published SOPs and kanban cards	✓ Yes
Create and edit SOPs and kanban cards (as drafts)	✓ Yes
Submit drafts for approval	✓ Yes
Create, rename and organise folders	✓ Yes
Run checklists and see everyone's checklist runs	✓ Yes
Record training for operators assigned to you	✓ Yes
Print, share and export PDFs, QR codes and links	✓ Yes
See your own activity in Analytics	✓ Yes
Approve or publish (yours or anyone else's)	✗ No (Pre Approvers and Approvers do this)
Delete SOPs or kanban cards	✗ No
Manage users, groups, roles and organisation settings	✗ No (Admins only)

1.2 Signing in for the first time

Your Admin creates your account. You'll receive either an **invitation link** by email or a **temporary password**.

1. Open SAWO Playbook in your browser and enter your **Email** and **Password**, then click **Sign in**.
2. If you signed in with a temporary password, the **Set your password** screen opens. Enter the temporary password, then your new password twice (at least 10 characters), and click **Set password and continue**.
3. If you got an invitation link instead, open it, enter your name and choose a password. You're signed in straight away.

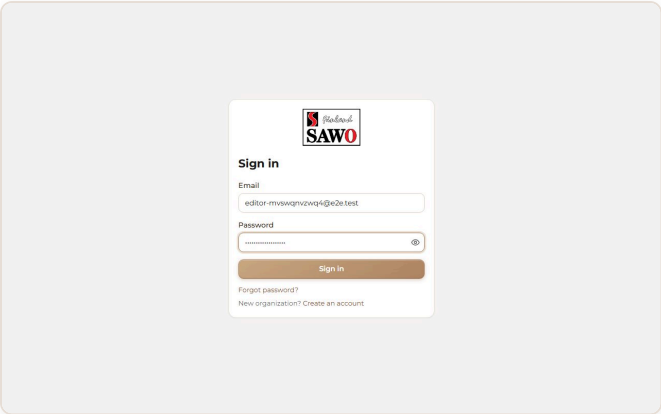

Figure 1. Sign in.

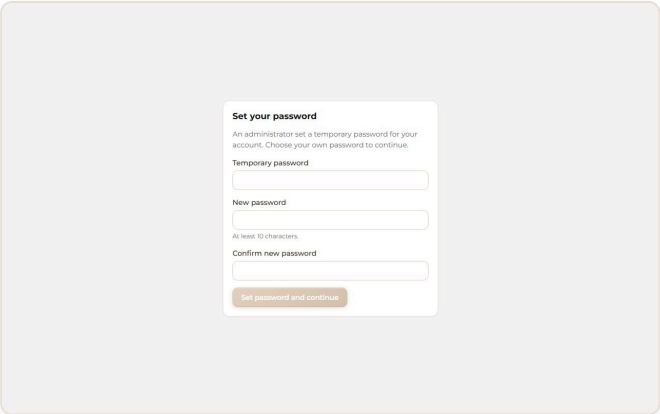

Figure 2. Set your own password at first sign-in.

> **Forgot your password?**
> Click **Forgot password?** on the sign-in screen and follow the emailed link.

1.3 Finding your way around

After signing in you land on **Standard Ops**. The screen has three parts:

- **Sidebar (left).** The main menu. **Work** holds your day-to-day screens and **Review** holds Approvals and Analytics. Your name and role are at the bottom, with **Logout**. Click the small arrow on its edge to collapse it.
- **Header (top).** The page title, the **global search** box and the **notifications bell**, which shows items waiting for you.
- **Toolbar (under the header).** The current page's own search, sort, filter, view buttons and the **+ Create New** button.

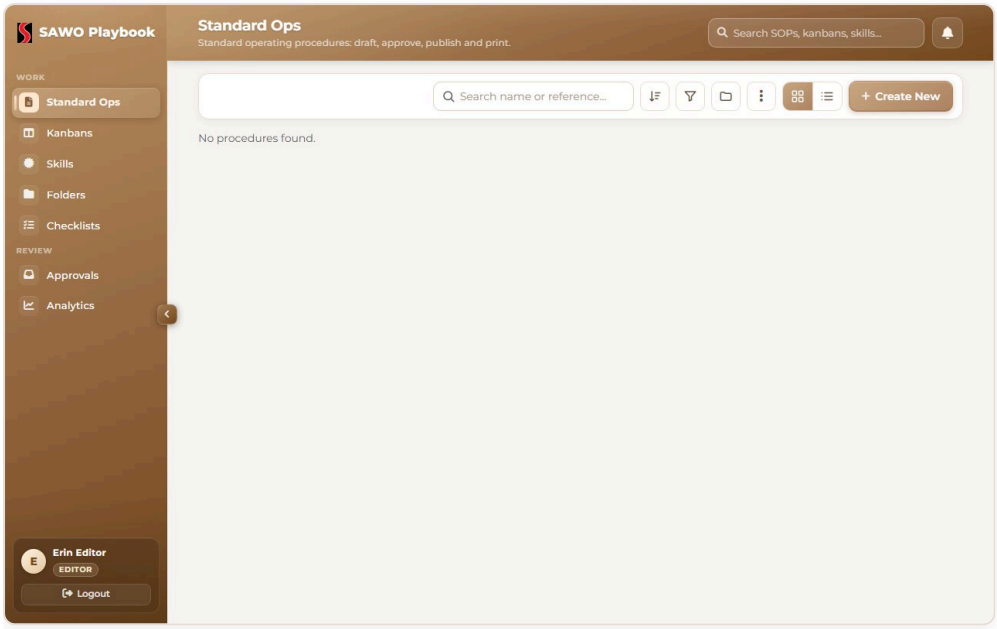

Figure 3. The Standard Ops page right after signing in.

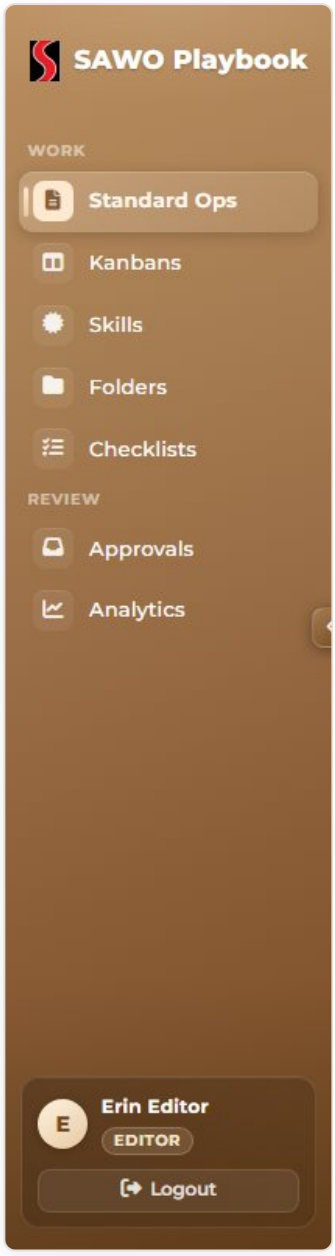

Figure 4. The sidebar for an Editor.

MENU ITEM	WHAT IT'S FOR
Standard Ops	Create, edit, view, print and share SOPs.
Kanbans	Kanban cards for parts and re-ordering.
Skills	The training matrix: who is trained on which SOP, and how well.
Folders	Organise SOPs into folders and subfolders.
Checklists	Checklist runs recorded against Checklist SOPs.
Approvals	Everything you've submitted and where it is in the approval process.
Analytics	Your activity: views, edits and checklist runs.

1.4 How approval works

Nothing you write goes live straight away. Each new SOP or SOP version, and each new or changed kanban card, follows this path:

- Your submission is **routed to your group(s)**. Only Pre Approvers and Approvers in those groups see it.
- At any stage a reviewer can Reject it with a reason. It comes back to you as a draft so you can fix it and submit again.
- While a new version is in review, operators keep seeing the **current published version**. Nothing changes for them until the new one is published.
- You can't approve your own work.

> **Your organisation's setup**
> Admins decide whether approval is switched on and how many approvers are needed. If approval is off, the editor's main button reads **Finish & Save** instead of **Finish & Submit**, and your changes publish directly.

2 Standard Ops (SOPs)

An SOP is a step-by-step procedure with photos, times and safety notes that operators follow, print or scan from a QR code.

2.1 Create a new SOP

1. Click **Standard Ops** in the sidebar.
2. Click **+ Create New** in the toolbar (top right).
3. Enter the **Procedure name**, e.g. *Changeover of die set on press line 2*.
4. Optional: pick a **Folder** and type a **Reference No.** Leave the reference blank to get the next number automatically (SOP-0001, SOP-0002 …).
5. Click **Create**. The SOP editor opens.

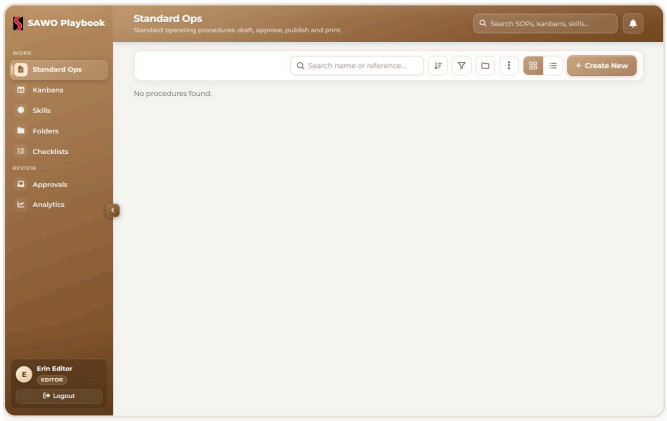

Figure 5. **+ Create New** is at the top right.

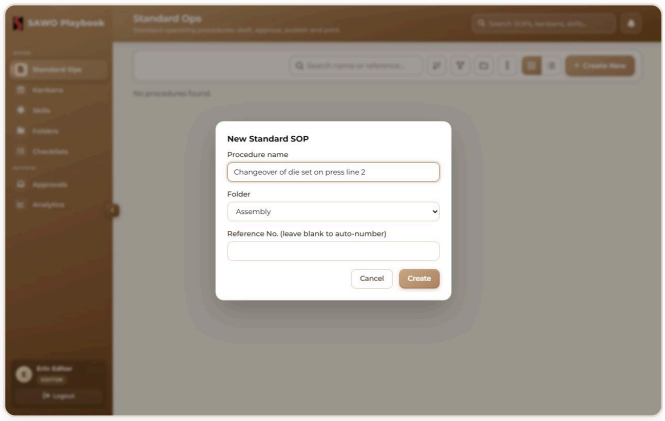

Figure 6. Name the SOP and choose a folder.

2.2 Name and SOP configuration

The top of the editor holds the SOP's name and its main settings. The bar at the top shows the version being edited (e.g. `v1.001 draft`) and the **Back**, **Cancel**, **Save As Draft** and **Finish & Submit** buttons.

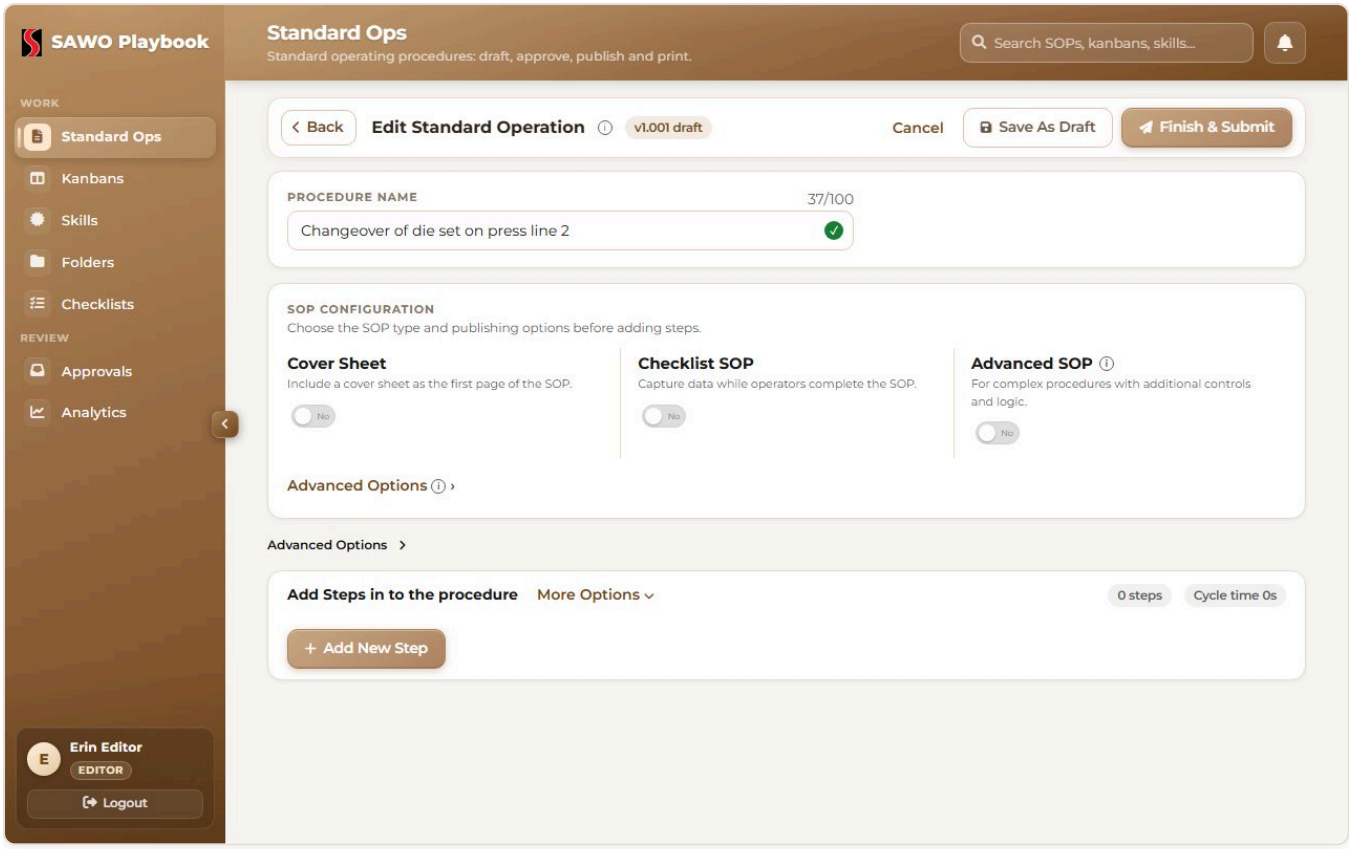

Figure 7. The SOP editor: name, configuration and the steps area.

SETTING	WHAT IT DOES
Procedure Name	The title operators see (max. 100 characters). A green tick shows it's saved.
Cover Sheet	Adds a cover page as the first page of the PDF.
Checklist SOP	Lets operators run the SOP as a checklist and record OK / NOT OK / N/A per step. See Checklists.
Advanced SOP	Gives every step its own **title**. Use it for long or complex procedures.
Advanced Options › (inside the configuration box)	Shows **Reference No.**, **Folder**, **Change summary** (what changed in this version) and the **Key points** and **Collaborate** switches.

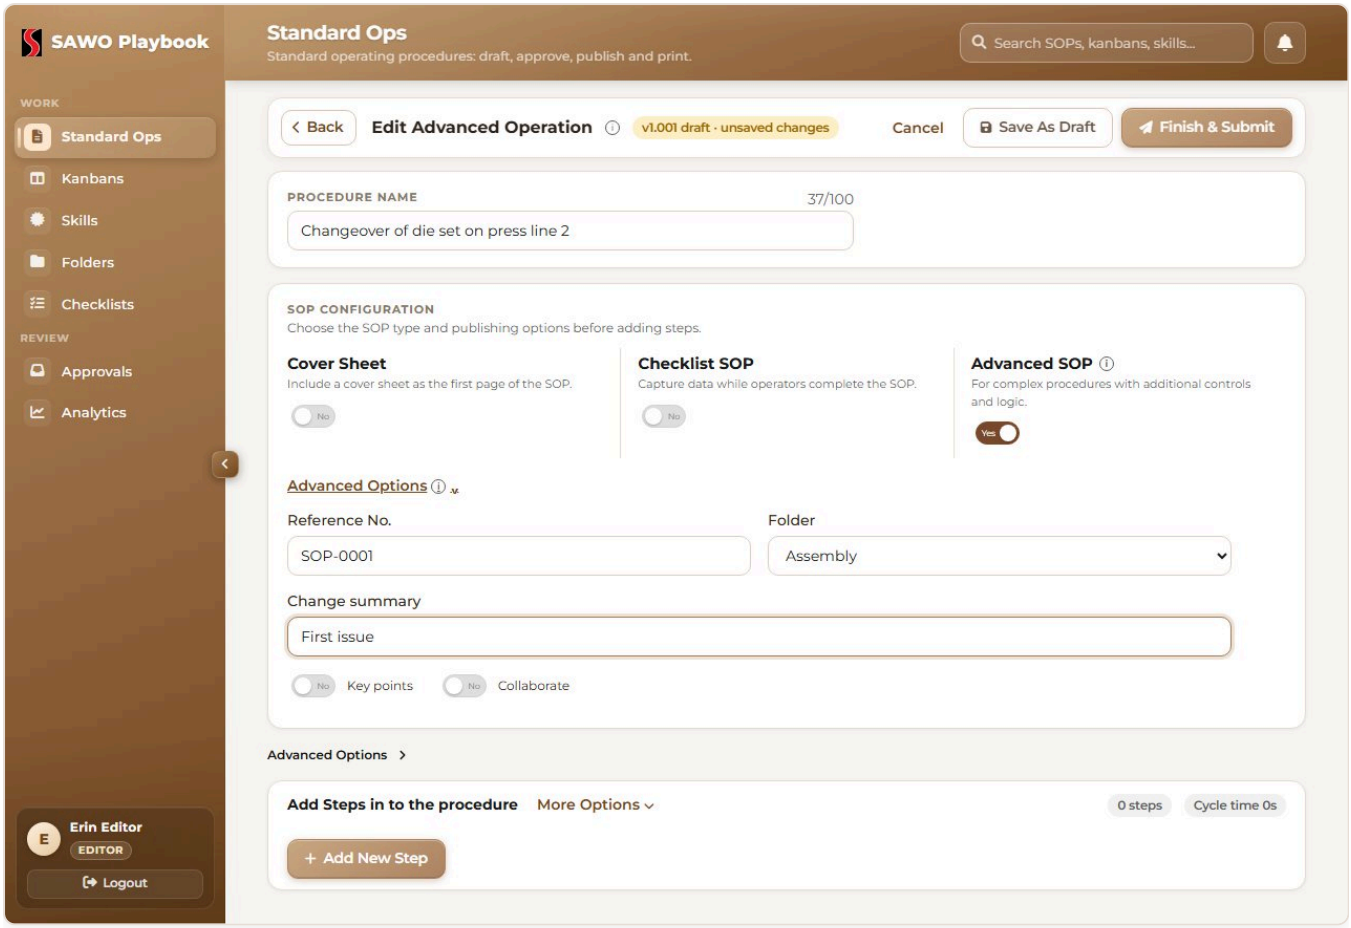

Figure 8. Advanced SOP switched on and Advanced Options opened. Fill in the **Change summary** so approvers know what changed.

2.3 PDF layout options

The second **Advanced Options ›** link, under the configuration box, controls how the printed PDF looks. Each heading opens when you click it:

- **Language Options**: the SOP's language.
- **Document Control Details**: reference number, date raised, revision number and date.
- **Presentation & Formatting**: PDF orientation, steps per page, borders, header/footer colours, and the colours of the Green/Red QR code PDF.
- **Functional Options**: mark the whole SOP as critical, add a video link.
- **Additional Display Items**: e.g. the total time required.

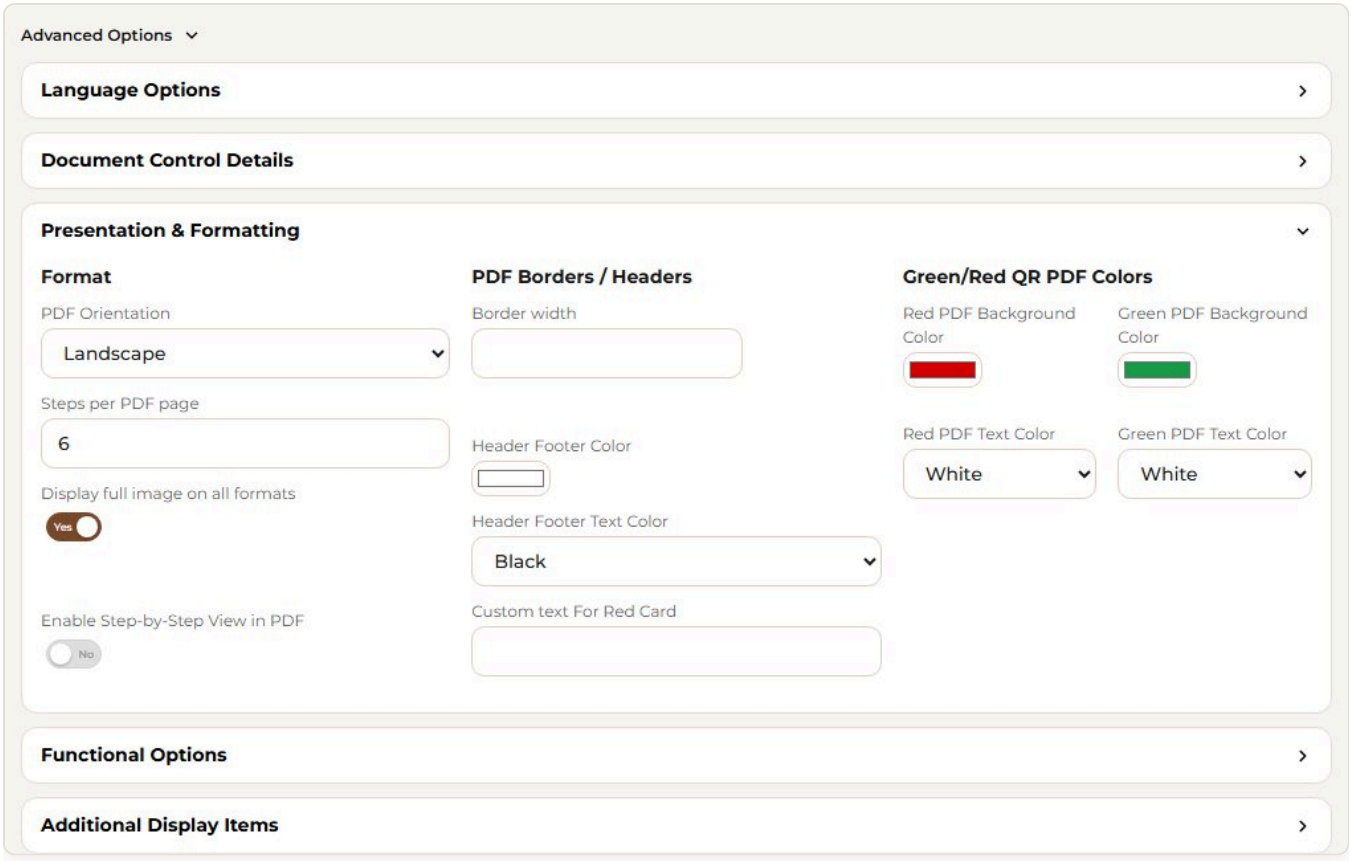

Figure 9. Presentation & Formatting opened.

2.4 Add and arrange steps

1. Click **+ Add New Step** at the bottom of the editor.
2. If Advanced SOP is on, type a **Step title**.
3. Type the **Description**. Use the toolbar for **bold**, *italic*, lists and colour. Keep it short: up to 400 characters fit best in the PDF.
4. Enter the **Planned Time** as `HH:MM:SS`. The SOP's cycle time is the total of all steps.
5. Add a picture: click **Add photo** or drag an image onto the box. On a phone or tablet you can take a photo directly.
6. Set the switches on the right if needed (see the table below).
7. Repeat for each step.

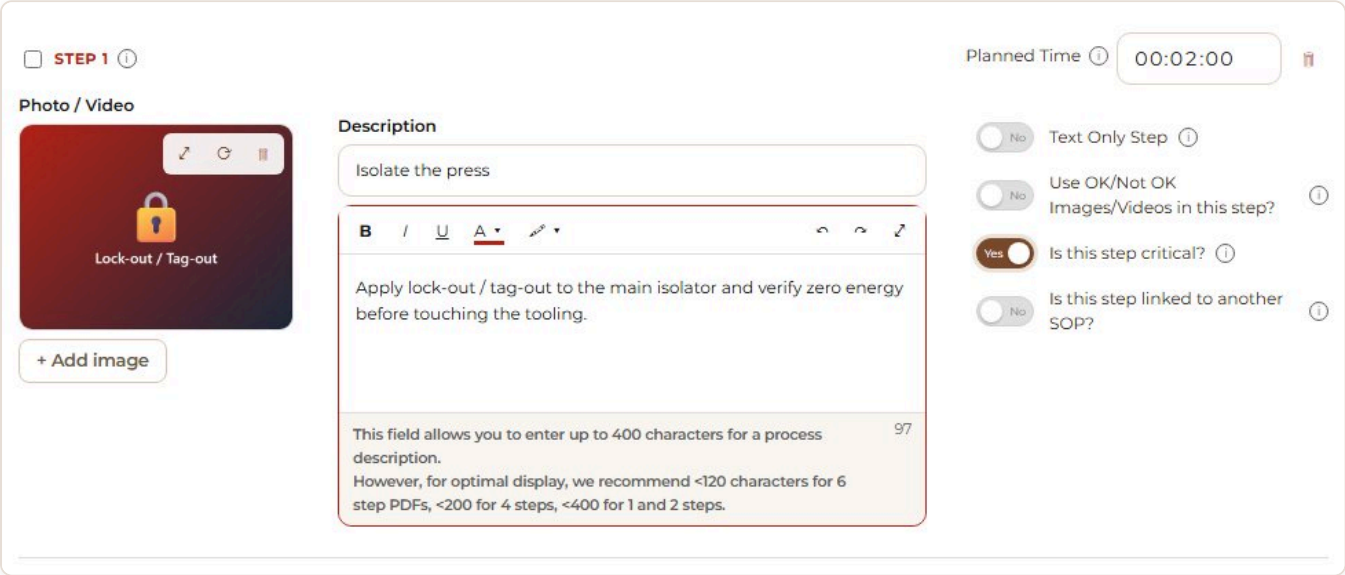

Figure 10. One step: photo on the left, title and description in the middle, switches on the right.

STEP SWITCH	USE IT WHEN…
Text Only Step	The step needs no photo or video.
Use OK/Not OK Images/Videos	You want to show the right way and the wrong way. The **first** image is labelled OK and the **second** NOT OK.
Is this step critical?	The step is safety or quality critical. It's highlighted in red for operators and in the PDF.
Is this step linked to another SOP?	Operators should follow another procedure here. Choose the SOP and operators get a link to it.

Rearranging steps

- Under each step: **Move Up**, **Move Down** and **Insert Step** (adds a step below this one).
- The bin icon at the top right of a step deletes it.
- **More Options** ˅ next to *Add Steps in to the procedure* lets you tick several steps and delete or move them together.

- The step count and total **Cycle time** are shown at the top right of the steps area.

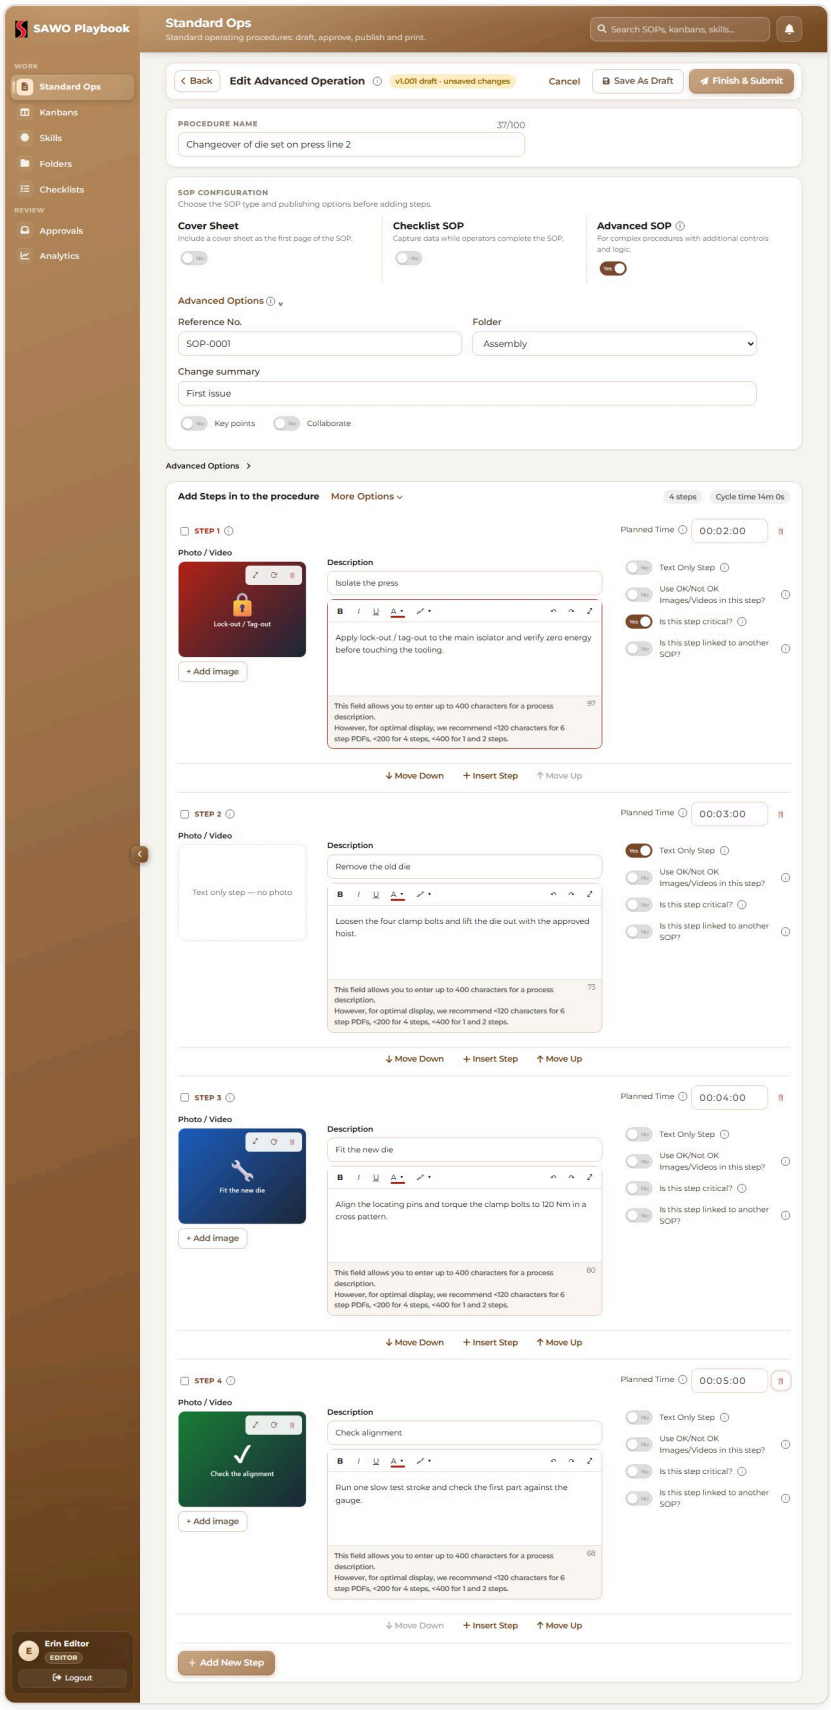

Figure 11. A finished draft with four steps. Step 1 is marked critical.

2.5 Save as Draft or Finish & Submit

BUTTON	WHAT HAPPENS
Save As Draft	Saves your work and keeps you in the editor. Only you and reviewers can see the draft. Come back to it any time with **Edit draft**.
Finish & Submit	Saves and sends the draft for approval. You need at least one step. You can add a change summary first under Advanced Options.
Cancel / **Back**	Leaves the editor. Save first, or unsaved changes are lost.

> **Tip**
> Save as draft often while you work on long SOPs, for example after every few steps or photos.

2.6 Follow the approval

After you submit, the SOP page opens. The **version box** (top right) shows the status, e.g. Pending pre-approval, and the group it was **Routed to**. Further down, the **Approvals** box lists every decision with the reviewer's name, date and comment.

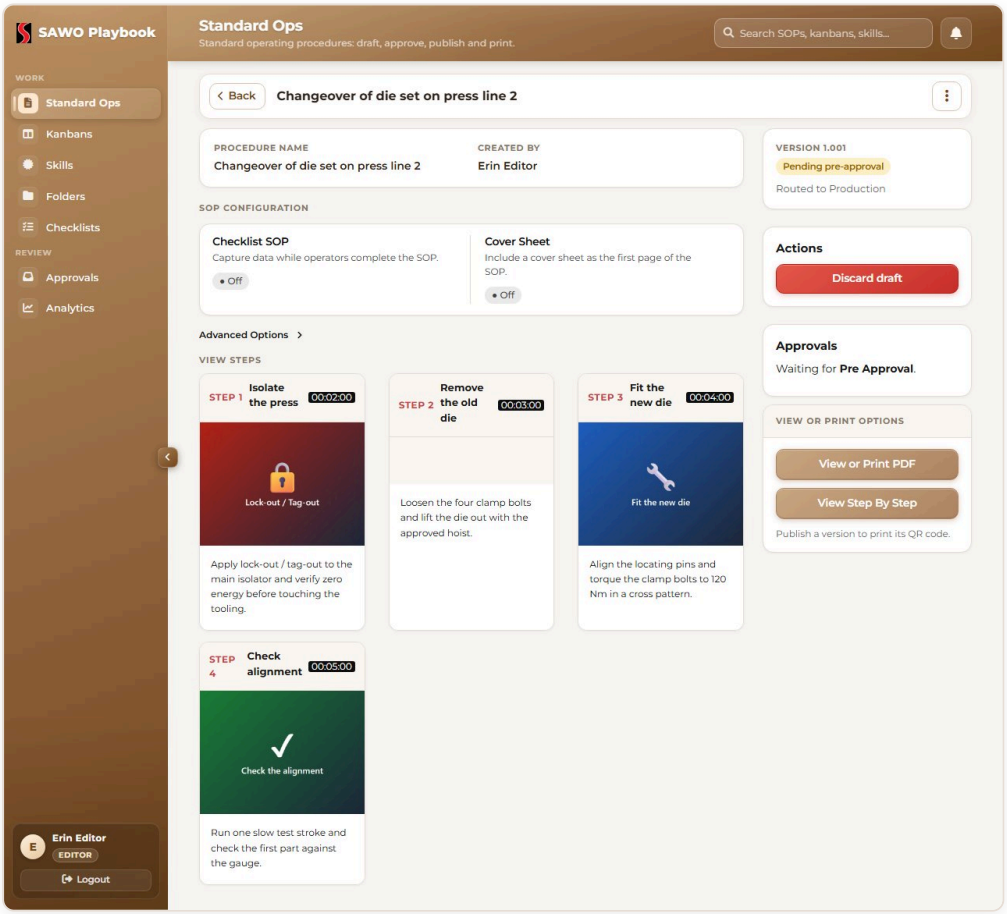

Figure 12. Submitted and waiting for pre-approval.

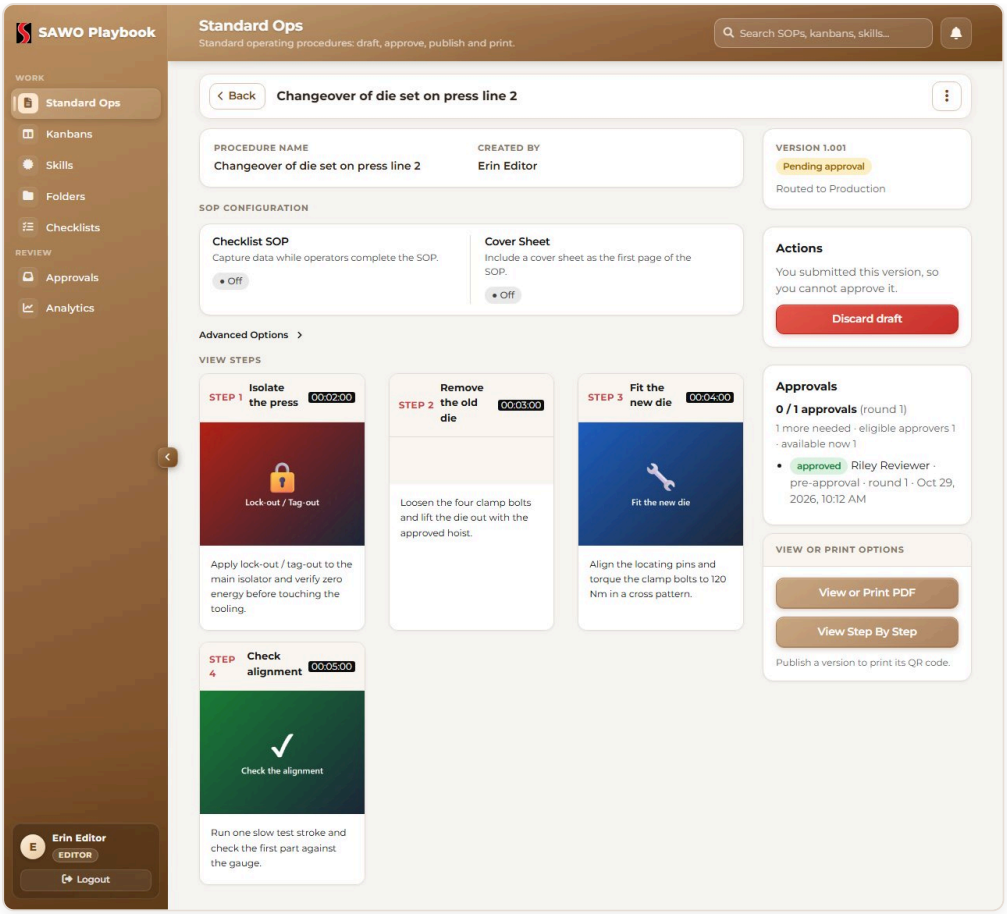

Figure 13. Riley (Pre Approver) has approved it. It's now waiting for the final approval.

- You can also follow all your submissions on the Approvals page (**Mine** tab) and from the **notifications bell**.
- You'll get an email when your SOP is approved, rejected or published.
- Changed your mind? Click **Discard draft** in the Actions box to throw the draft away.

> **"Blocked" status**
>
> If you see **Blocked – no eligible Pre Approver / Approver exists for this group**, nobody in your group can review the item yet. Admins are notified automatically. Ask your Admin to add a reviewer to the group.

2.7 If your SOP is rejected

A rejected SOP comes back to you as a **draft**, with a red Rejected banner showing who rejected it and why.

1. Open the SOP from **Standard Ops** or **Approvals → Rejected**.
2. Read the reason in the red banner and in the Approvals box.
3. Click **Edit draft** (top right), make the changes and click **Finish & Submit** again. Or click **Submit for approval** on the SOP page if the draft is already fixed.

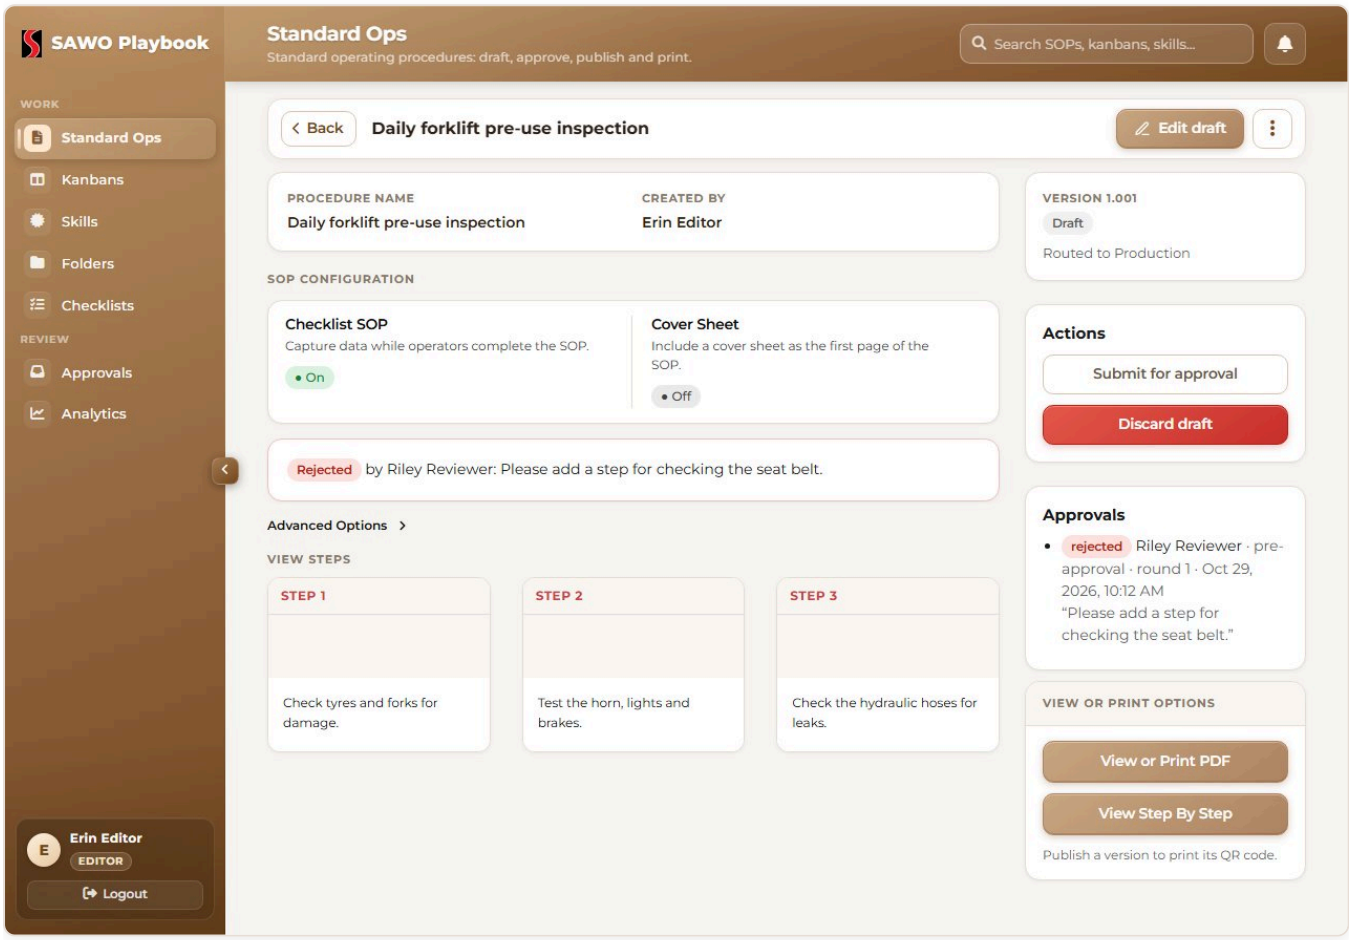

Figure 14. The reviewer asked for an extra step. The reason is shown in the banner.

2.8 View, print and share a published SOP

Once published, the version box shows Published and the side panel offers view, print and share options.

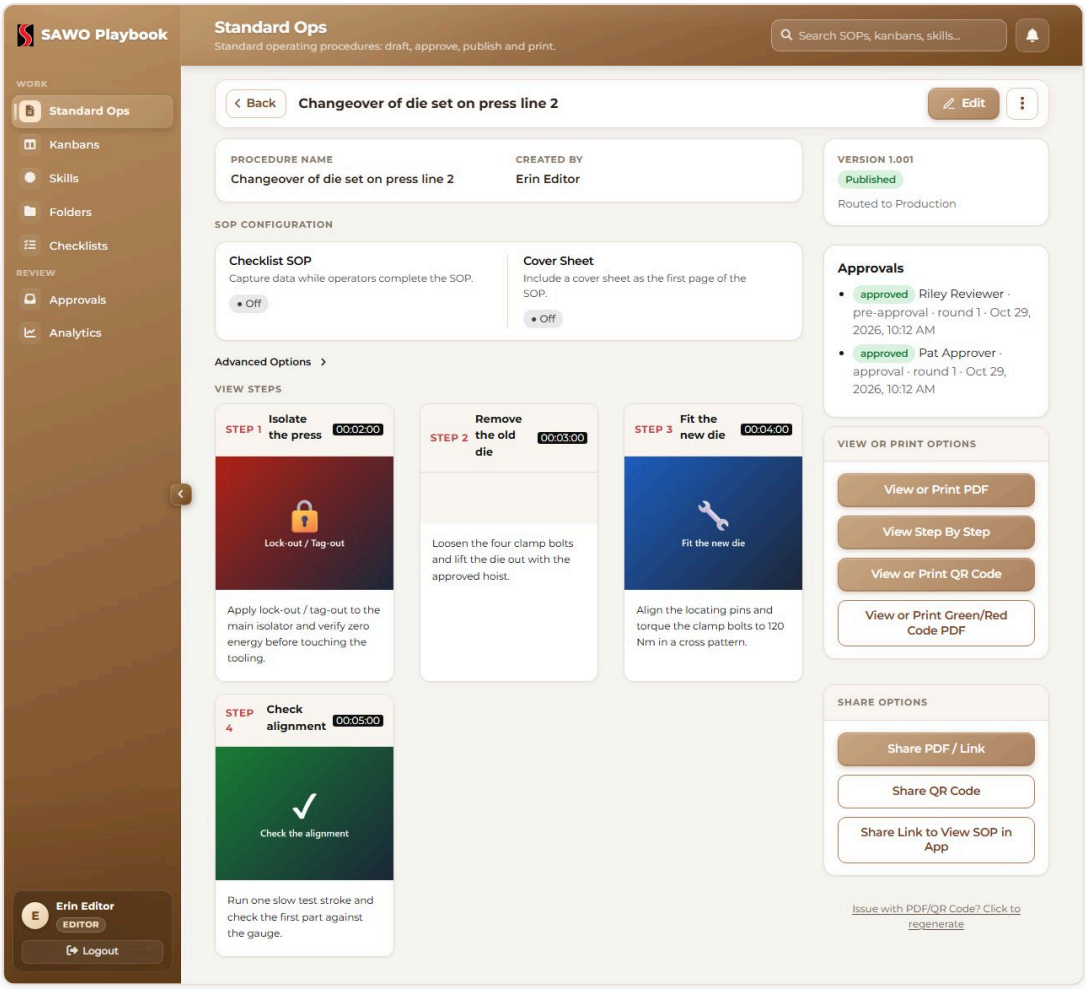

Figure 15. A published SOP with its steps, approval history and options.

Figure 16. View or Print Options.

Figure 17. Share Options.

OPTION	WHAT IT DOES
View or Print PDF	Opens the SOP as a PDF, laid out with your PDF options. Print it or save it.
View Step By Step	Opens the kiosk view: one large step at a time with **Previous** / **Next**. Good for a tablet at the workstation.
View or Print QR Code	A printable QR code. Scanning it opens the current published version. When a new version is published, the same QR code shows the new one, so you don't need to reprint.
View or Print Green/Red Code PDF	A green/red QR code sheet for the workstation, coloured as set in the PDF options.
Share PDF / Link	Copies the QR link to your clipboard so you can paste it into an email or chat.
Share QR Code	Downloads the QR code as a PNG image.
Share Link to View SOP in App	Copies a link to this SOP page in SAWO Playbook. The person must be signed in to open it.
Issue with PDF? Click to regenerate	Rebuilds the PDF if it looks out of date or broken.

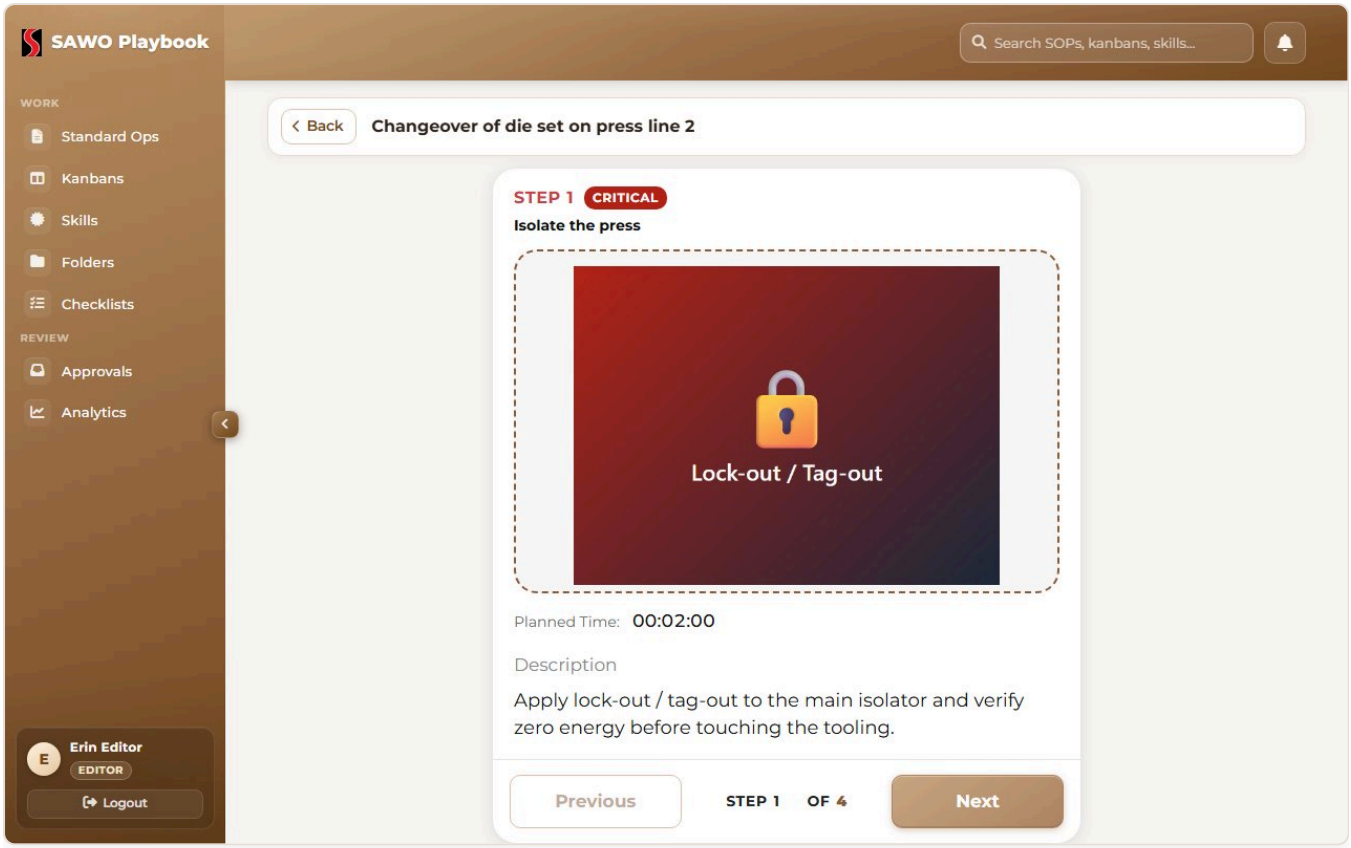

Figure 18. View Step By Step (kiosk view). Critical steps are flagged **CRITICAL**.

2.9 Find SOPs: search, filter, views

The toolbar on the Standard Ops page helps you find any SOP quickly:

- **Search box**: type part of a name or reference number.
- **Sort** (⇅): Oldest, Newest, Date Modified, Alphabetical or Reference No.
- **Filter** (funnel): by type, status (Published, Draft, Pending approval, Approved, Archived), folder, Checklist SOPs only, and who created it. Click **Clear all** to reset.
- **Folder** icon: jumps to the Folders page.
- **⋮ menu**: import and export options, if your role allows them.
- **Grid / List**: cards or a compact table. Your choice is remembered.

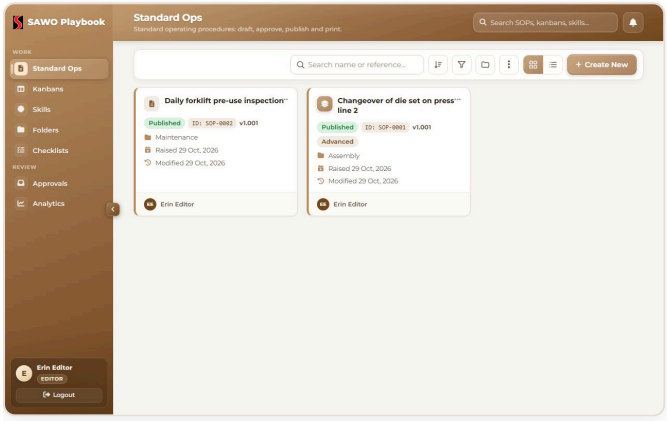

Figure 19. Grid view. Each card shows status, reference, version, folder and dates.

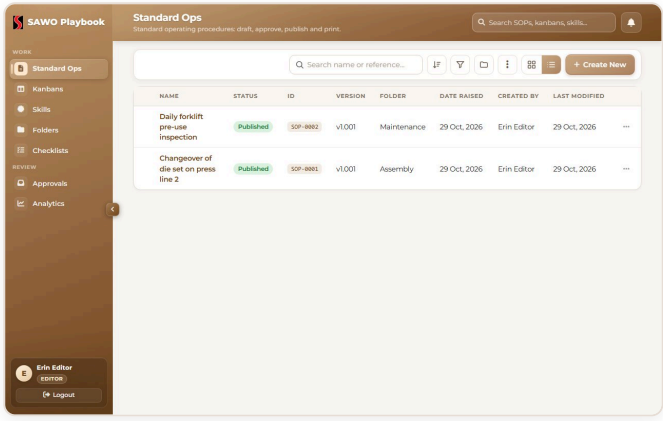

Figure 20. List view.

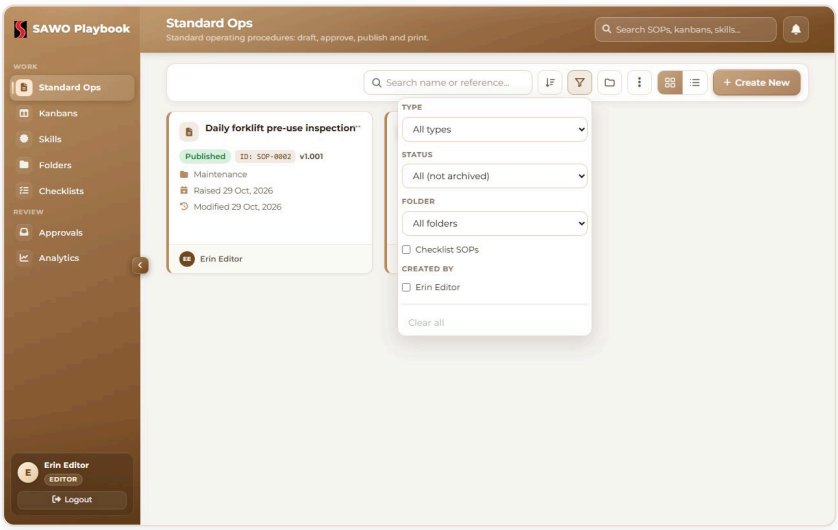

Figure 21. The filter panel.

2.10 The SOP card menu

Click the **...** button on any SOP card (top right of the card) for quick actions:

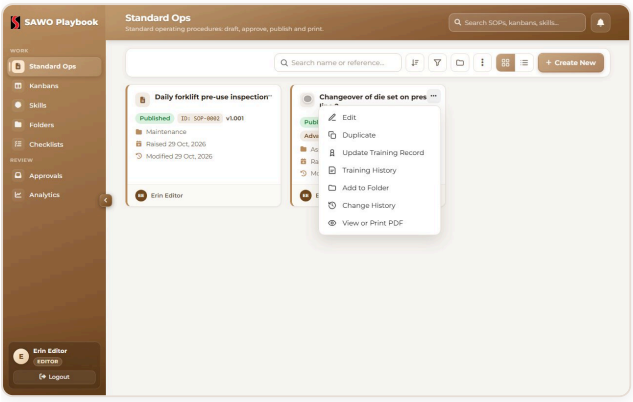

Figure 22. The card menu.

ACTION	USE
Edit	Start a new draft version.
Duplicate	Copy the SOP as a starting point for a new one.
Update Training Record	Record an operator's training. See Skills.
Training History	Who was trained on this SOP, when, and by whom.
Add to Folder	Move the SOP into a folder.
Change History	All versions with their change summaries.
View or Print PDF	Opens the published PDF.

2.11 Update a published SOP

You never edit a published SOP directly. You create a **new version**, and the published one stays live until the new one is approved.

1. Open the SOP and click **Edit** (top right), or use **Edit** in the card menu.
2. A new draft version opens (e.g. `v1.002 draft`). Make your changes and write a **Change summary** under Advanced Options.
3. Click **Finish & Submit**. Or click **Save As Draft** now and submit later with **Submit for approval** on the SOP page.

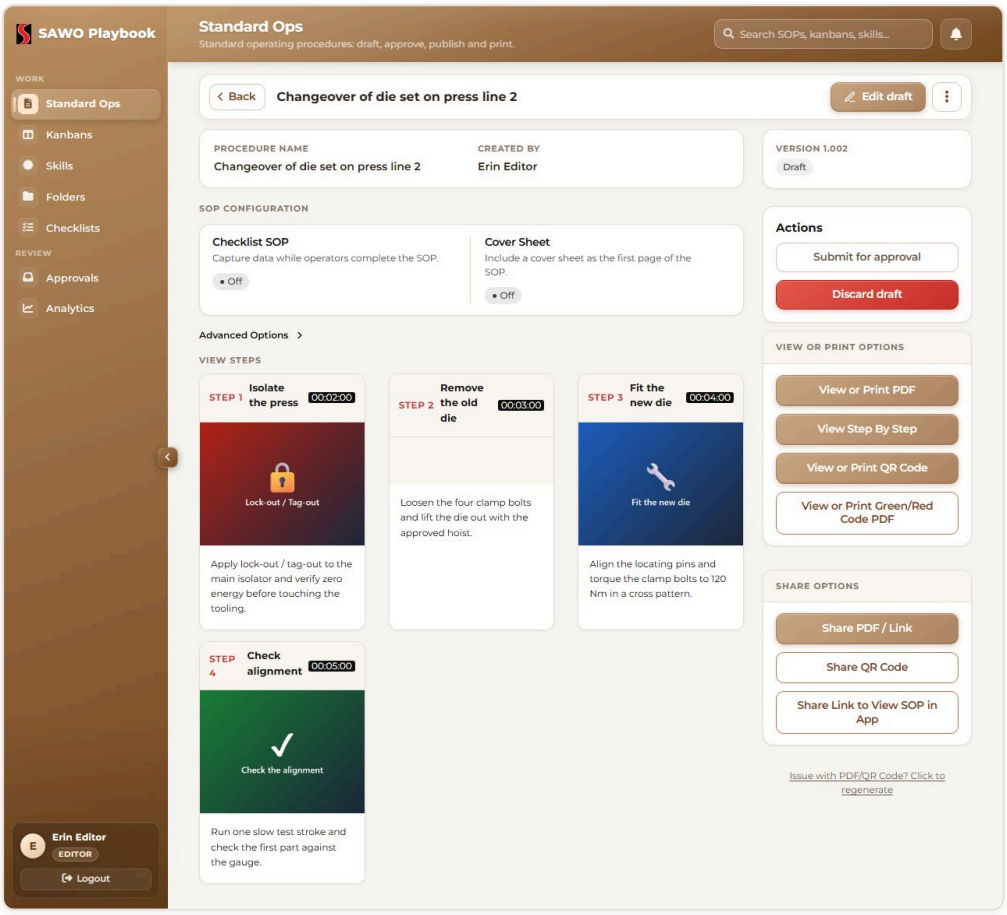

Figure 23. A new draft of a published SOP. The Actions box offers **Submit for approval** and **Discard draft**.

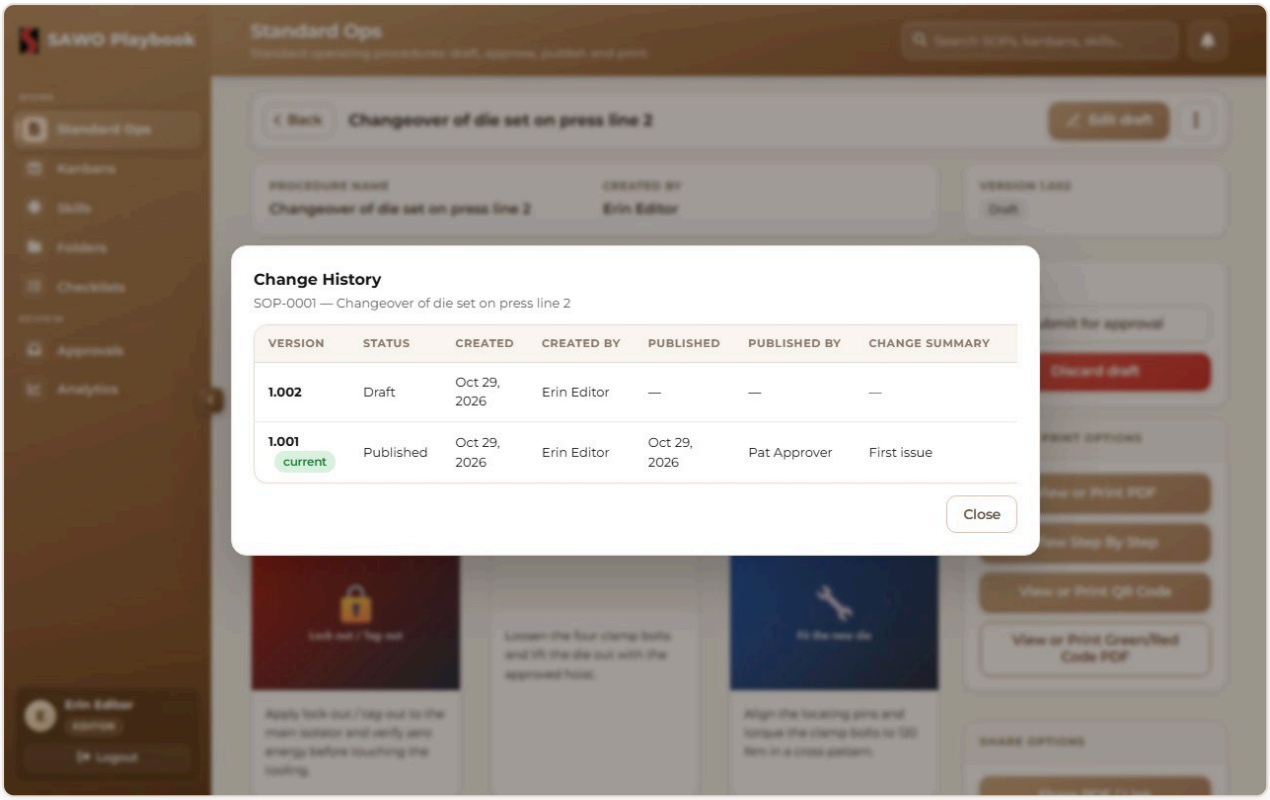

Figure 24. Change History lists every version, who created and published it, and its change summary.

Operators are not affected

Until the new version is published, operators, QR codes and printed PDFs keep showing the current published version.

3 Checklists

A Checklist SOP lets operators record a result for every step, e.g. a daily pre-use inspection.

3.1 Make an SOP a Checklist SOP

In the SOP editor, switch on **Checklist SOP** under SOP Configuration (section 2.2), then submit as usual. You can only start a checklist run on a **published** Checklist SOP.

3.2 Run a checklist

1. Open the published Checklist SOP and click **Start checklist** in the Actions box.
2. For each step click **OK**, **NOT OK** or **N/A**. Add a **Comment** or a **Photo** where useful, especially for NOT OK.
3. The counter at the top shows how many steps are answered (e.g. `4/4 answered`).
4. When every step is answered, click **Complete checklist**. To stop without finishing, click **Abandon**.

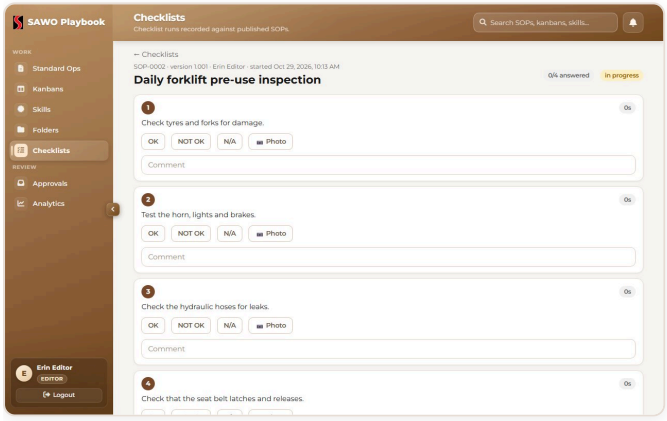

Figure 25. A new checklist run.

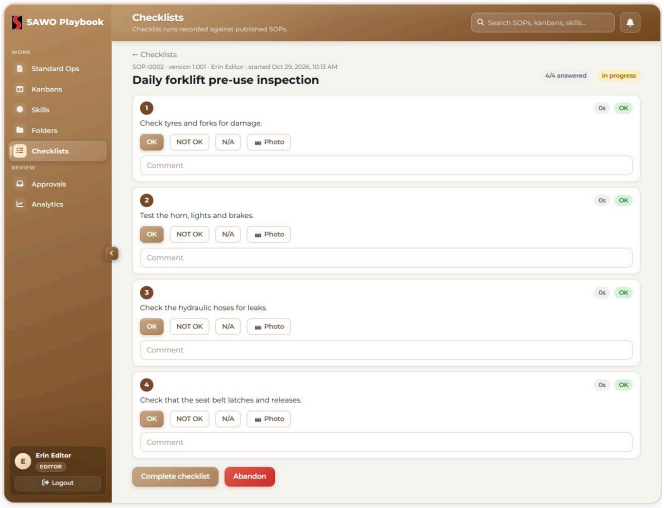

Figure 26. All steps answered, ready to complete.

3.3 Review checklist runs

The **Checklists** page lists every run with the operator, start time, progress and status. As an Editor you see everyone's runs. Use the tabs to filter by **In progress**, **Completed**, **Abandoned** or **With NOT OK steps**, and click **View** to open a run.

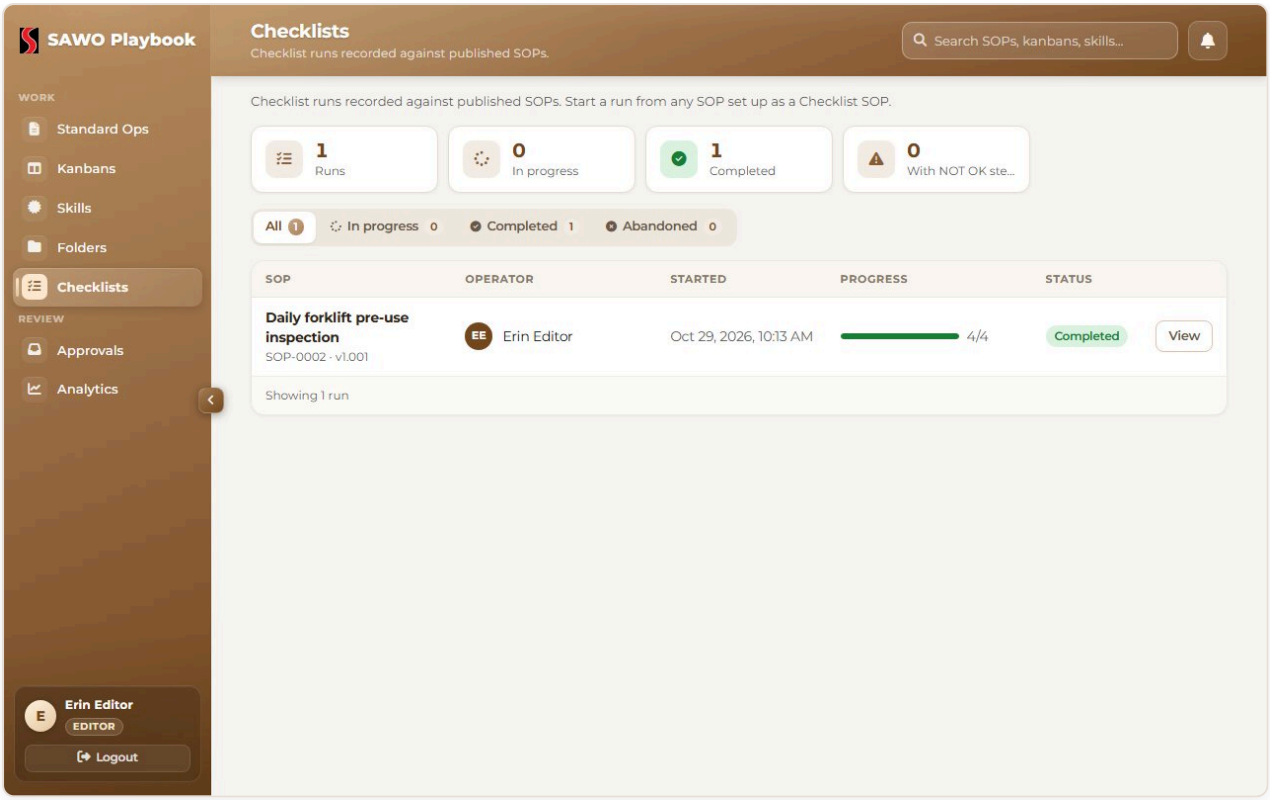

Figure 27. The Checklists page.

4 Folders

Folders group SOPs by area, line or department. Folders can have subfolders.

Create a folder

1. Click **Folders** in the sidebar.
2. Type a name in **New folder name**.
3. Choose where it goes: **At the top level**, or inside another folder to make a subfolder.
4. Click **+ Create folder**.

Manage folders

Each folder row has buttons on the right:

- **Add subfolder** (folder + icon): create a folder inside this one.
- **Rename** (pencil).
- **Move to...**: move the folder, with everything in it, under another folder.
- **Delete** (bin).

Click a folder name to see its SOPs, including those in subfolders. **SOPs not in a folder** (top right) lists the SOPs still to be filed. To put an SOP into a folder, use **Add to Folder** in the SOP card menu, or set the folder in the editor's Advanced Options.

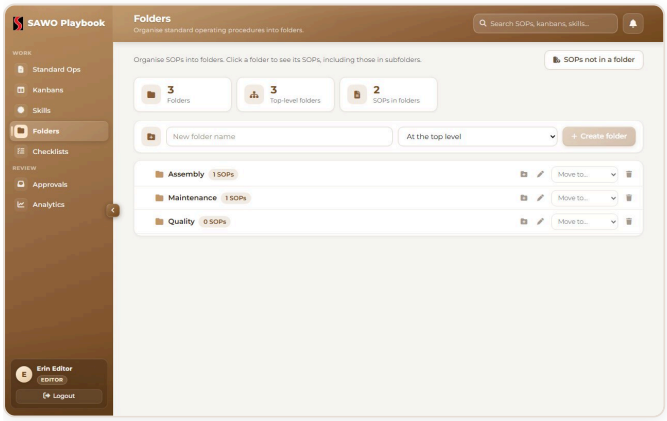

Figure 28. The Folders page.

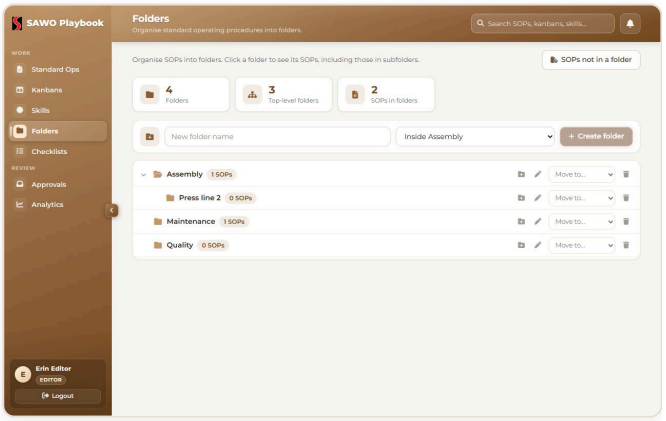

Figure 29. "Press line 2" created as a subfolder of Assembly.

5 Kanban cards

A kanban card describes a part: what it is, where it's stored, when to re-order and how. The QR code on the back of the printed card opens the supplier's web page, an order email or an ordering SOP.

5.1 Create a kanban card

1. Click **Kanbans** in the sidebar, then **+ Create New**.
2. Add a picture on the left: click **Upload photo**, drag an image in, or paste one (Ctrl+V).
3. Choose the **Kanban Type**: *Template 01*, or *Template 02* if you need price and carriage.
4. Fill in the **Part Description** and choose the **QR Code Options** (see below).
5. Fill in the part details. Only **Sawo Inc Part Number** is required.
6. Optional: choose a **PDF Header Color**, add custom fields and **Tags** (type a tag and press Enter).
7. Click **Save draft**.

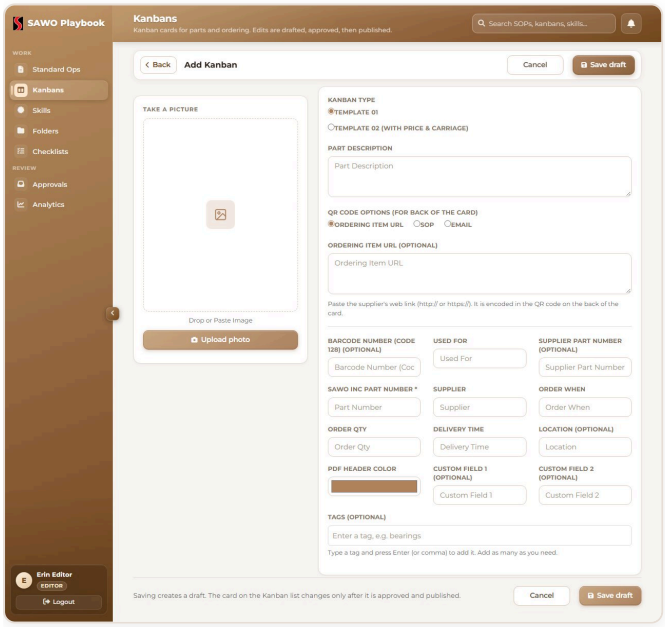

Figure 30. The Add Kanban form.

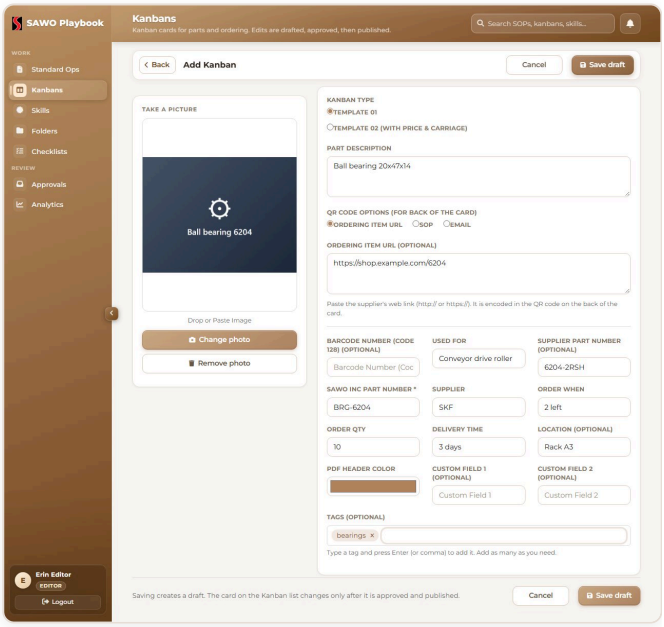

Figure 31. The form filled in for a bearing.

QR CODE OPTION	SCANNING THE CARD'S QR CODE…
Ordering Item URL	opens the supplier's web page. Paste the full link (https://…).
SOP	opens the chosen ordering SOP.
Email	opens a new order email to the address you enter, e.g. purchasing@…

FIELD	EXAMPLE / NOTE
Sawo Inc Part Number *	`BRG-6204`. Required. Shown as the card's name.

Supplier / Supplier Part Number	`SKF` / `6204-2RSH`
Used For	Where the part is used, e.g. *Conveyor drive roller*.
Order When / Order Qty	The re-order point and quantity, e.g. *2 left* / *10*.
Delivery Time / Location	*3 days* / *Rack A3*
Barcode Number (Code 128)	Optional. Printed as a barcode on the card.
Price / Carriage	Template 02 only.

5.2 Submit a new card for review

A brand-new card doesn't appear on the Kanbans page until it's published. Until then you'll find the draft on the **Approvals** page.

1. Click **Approvals** in the sidebar and open the **Mine** tab. Your new card is listed with stage **Draft**.
2. Click **Open**.
3. Check the details and click **Submit for review**. The status changes to **Pending pre-approval**.

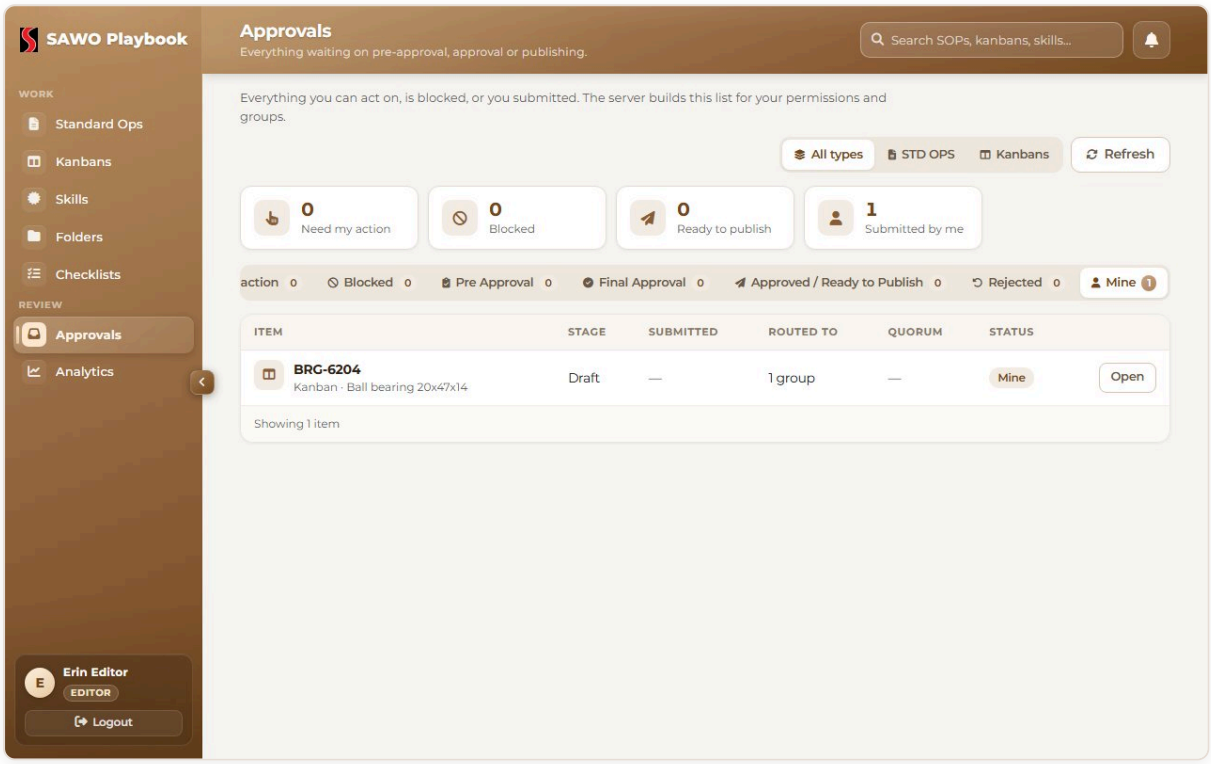

Figure 32. The new card in Approvals → Mine.

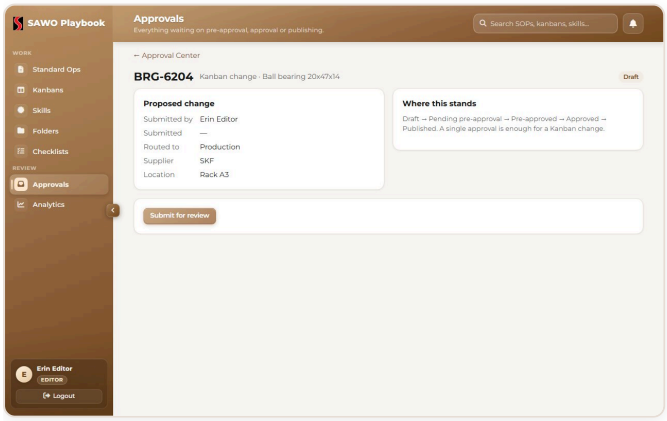

Figure 33. The draft card with **Submit for review**.

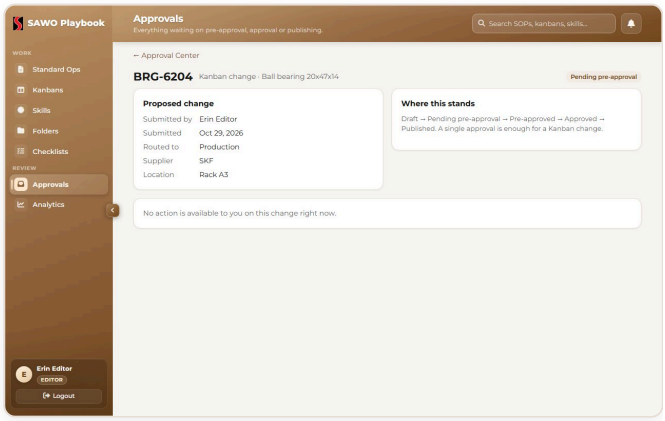

Figure 34. Submitted. It's now with the reviewers.

> **Kanban approvals**
> Kanban changes follow the same Draft → Pre-approval → Approval → Published path as SOPs, but a **single approval** is always enough. If a reviewer rejects your card, it shows under **Approvals** → **Rejected** with the reason.

5.3 Published cards: view, print, share

Once published, the card appears on the **Kanbans** page. Search by part, supplier or tag, and use sort and filter like on the SOP page. Click a card to open it.

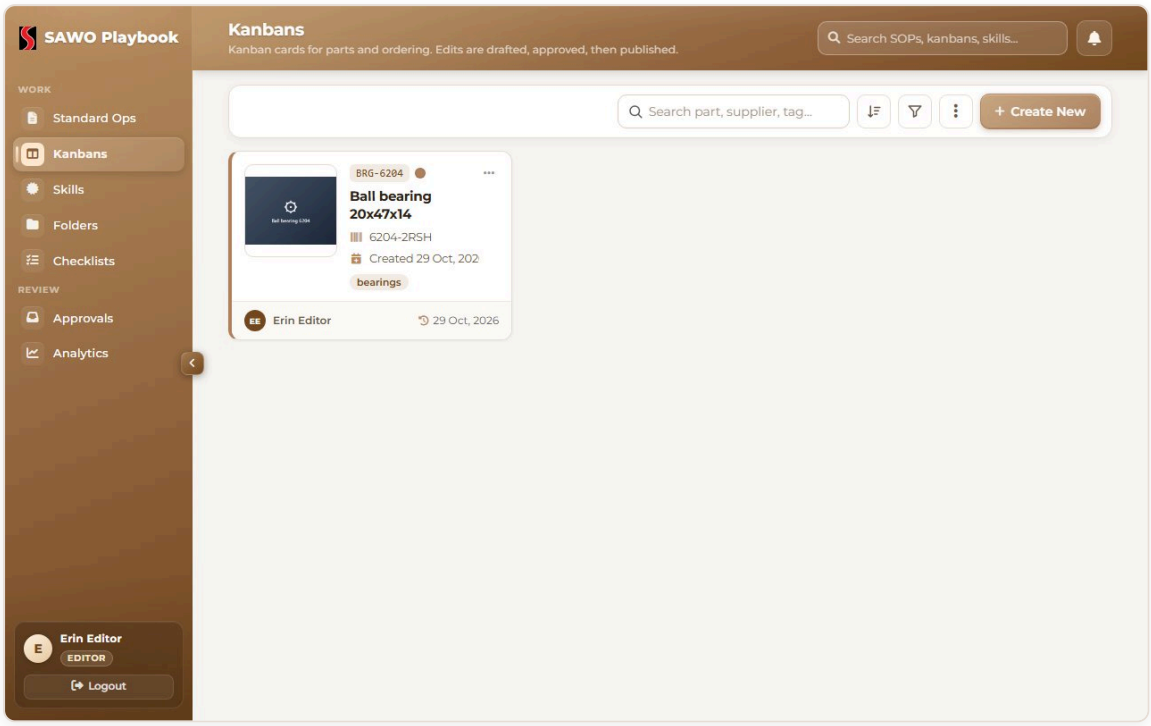

Figure 35. The Kanbans page with the published card.

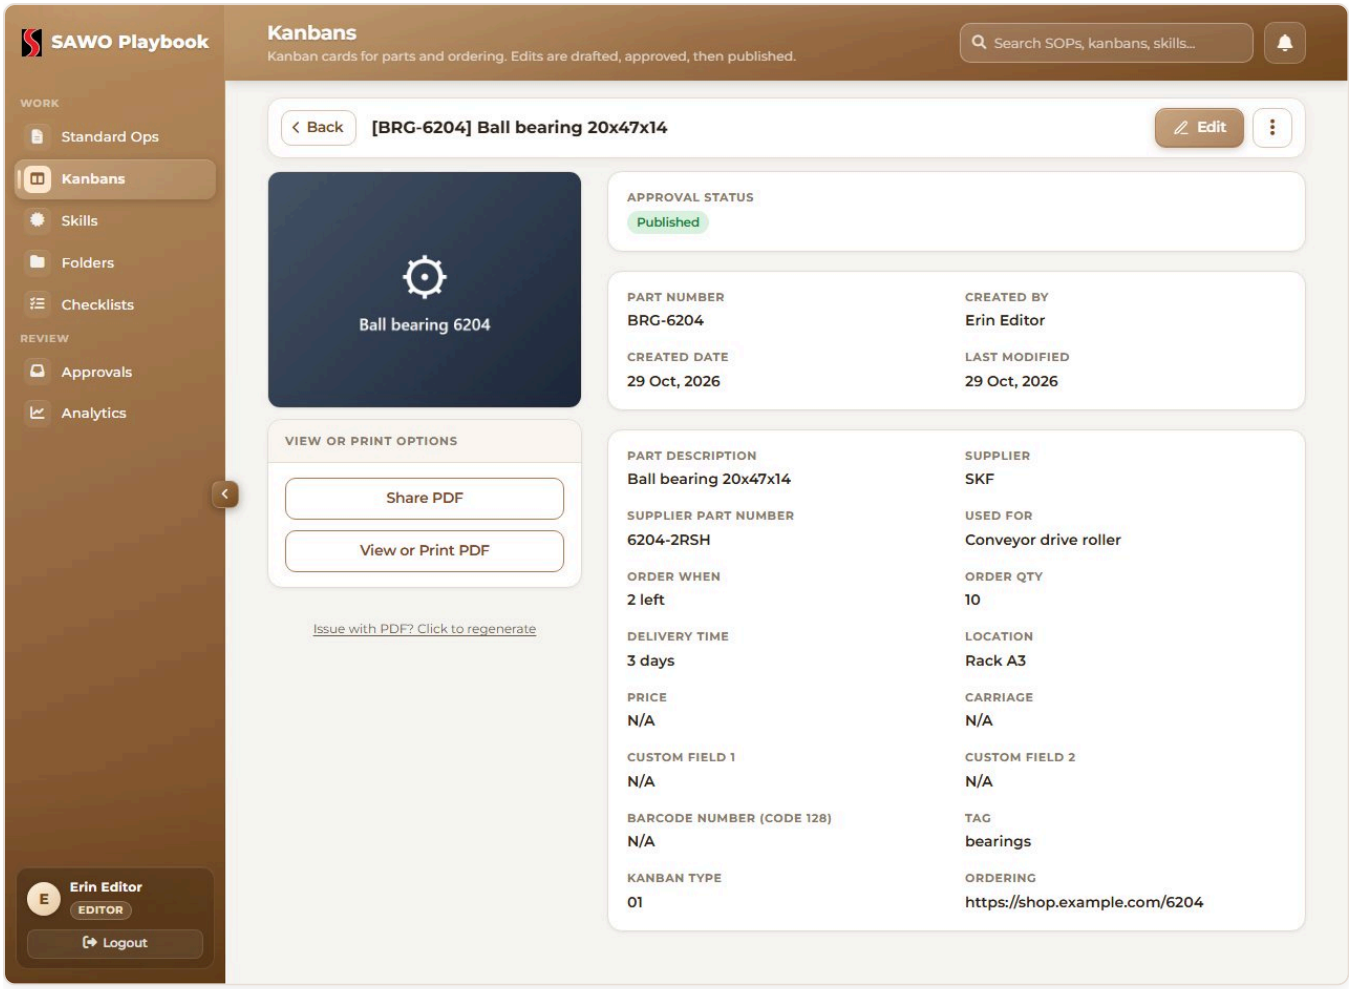

Figure 36. The card page: picture, approval status, all details, and the View or Print Options.

- **View or Print PDF**: the printable kanban card, front and back with the QR code.
- **Share PDF**: opens your device's share menu with the card's PDF file (on a computer, it downloads the PDF).
- The ⋯ menu on each card in the list offers **Edit**, **Duplicate** (start a new card from this one), **Change History** and **View or Print PDF**.

5.4 Change an existing card

1. On the Kanbans page click the card's ⋯ menu and choose **Edit**, or open the card and click **Edit**.
2. Change what you need (e.g. a new **Order Qty**) and click **Save draft**. You go back to the card page, and the **Approval status** shows **Draft**.
3. Click **Submit for review**. The status shows who it's waiting on.

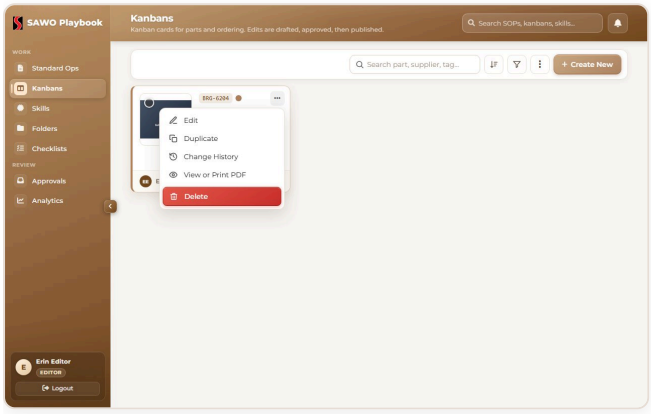

Figure 37. The card menu.

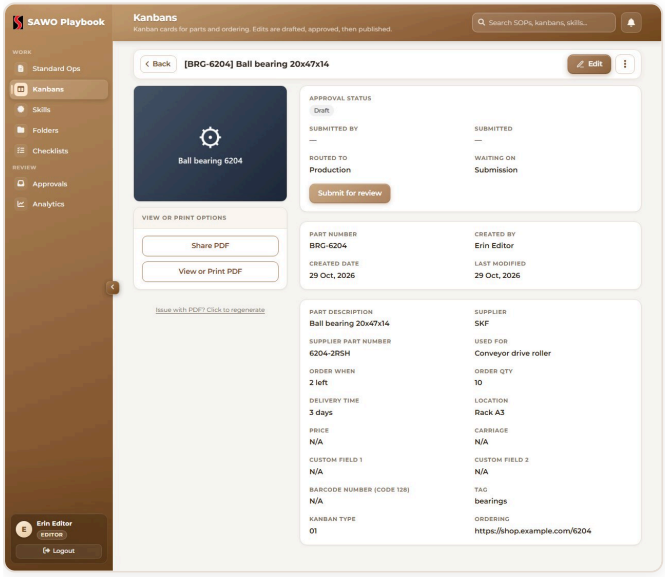

Figure 38. A change saved as a draft.

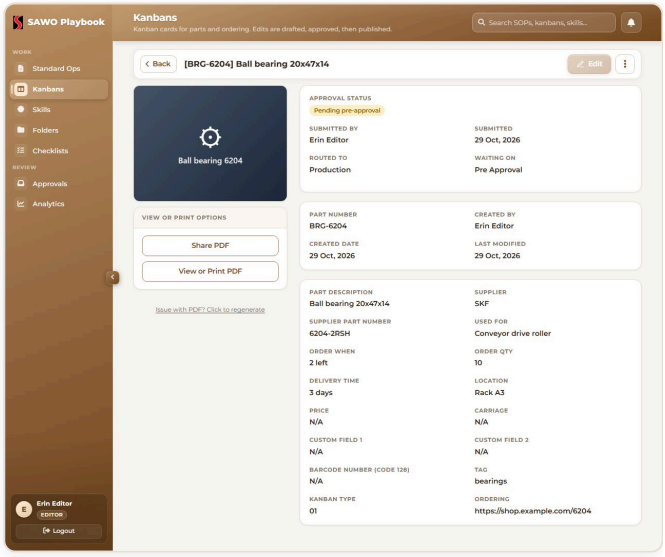

Figure 39. Submitted. It's waiting on Pre Approval.

> **The live card stays the same**
>
> Until your change is published, the card, its PDF and its QR code keep showing the current details. While a change is in review the **Edit** button is disabled. You can edit again once the review is finished.

6 The Approvals page

Everything you've submitted, and where it is now, for SOPs and kanbans in one place.

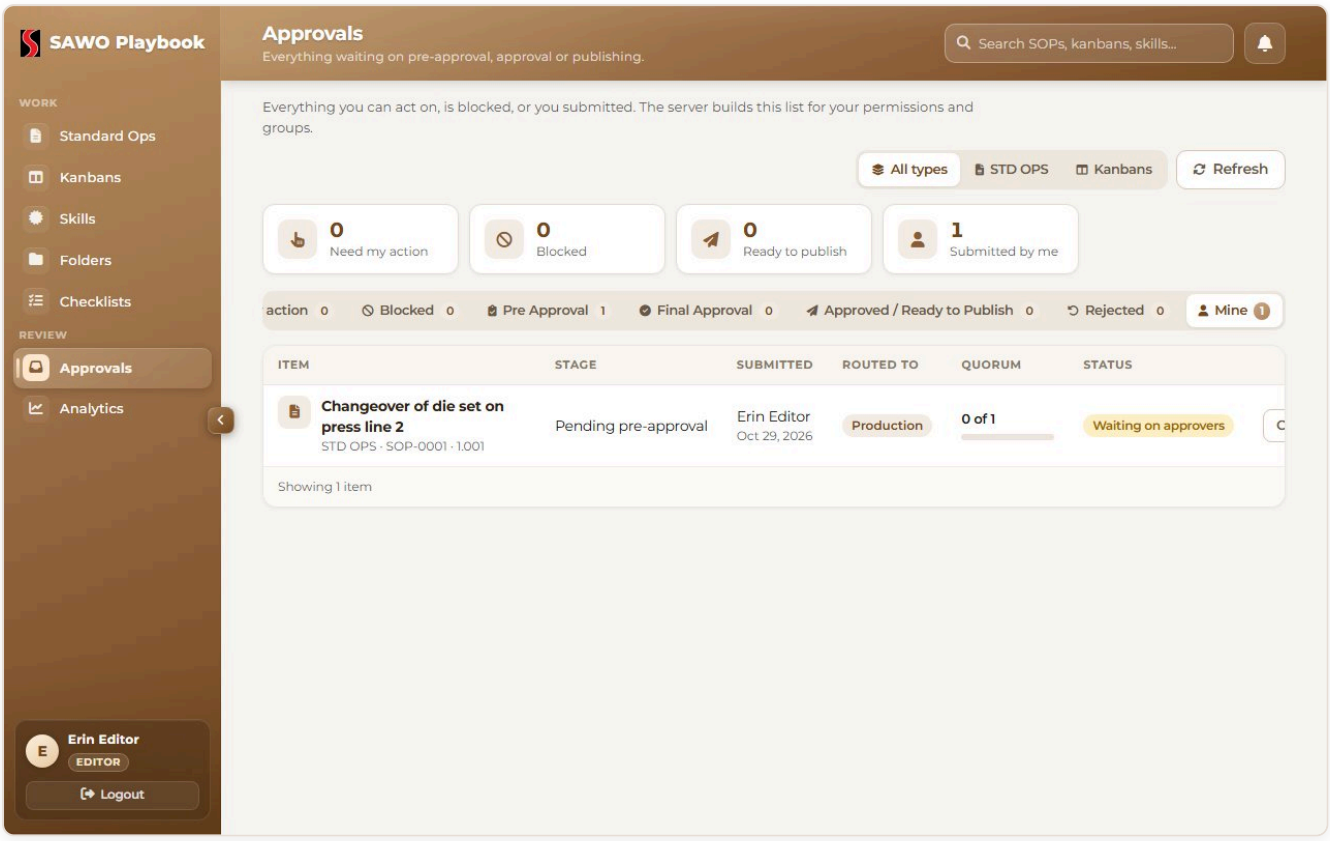

Figure 40. Approvals, Mine tab: one SOP waiting for pre-approval.

- The **summary tiles** count items that **Need my action**, are **Blocked**, are **Ready to publish**, and were **Submitted by me**.
- The **type switch** (All types / STD OPS / Kanbans) narrows the list. **Refresh** reloads it.
- The **tabs** filter by stage. As an Editor you'll mostly use these:

TAB	SHOWS
Mine	Everything you created that isn't published yet, including drafts of brand-new kanban cards.
Rejected	Your items that a reviewer sent back, with the reason.
Blocked	Your items that have no eligible reviewer in their group (ask your Admin).
Pre Approval / Final Approval / Approved – Ready to Publish	Items at each stage that you can see.

Click **Open** on a row to go to the item. When everything is done, the list shows *Nothing is waiting*.

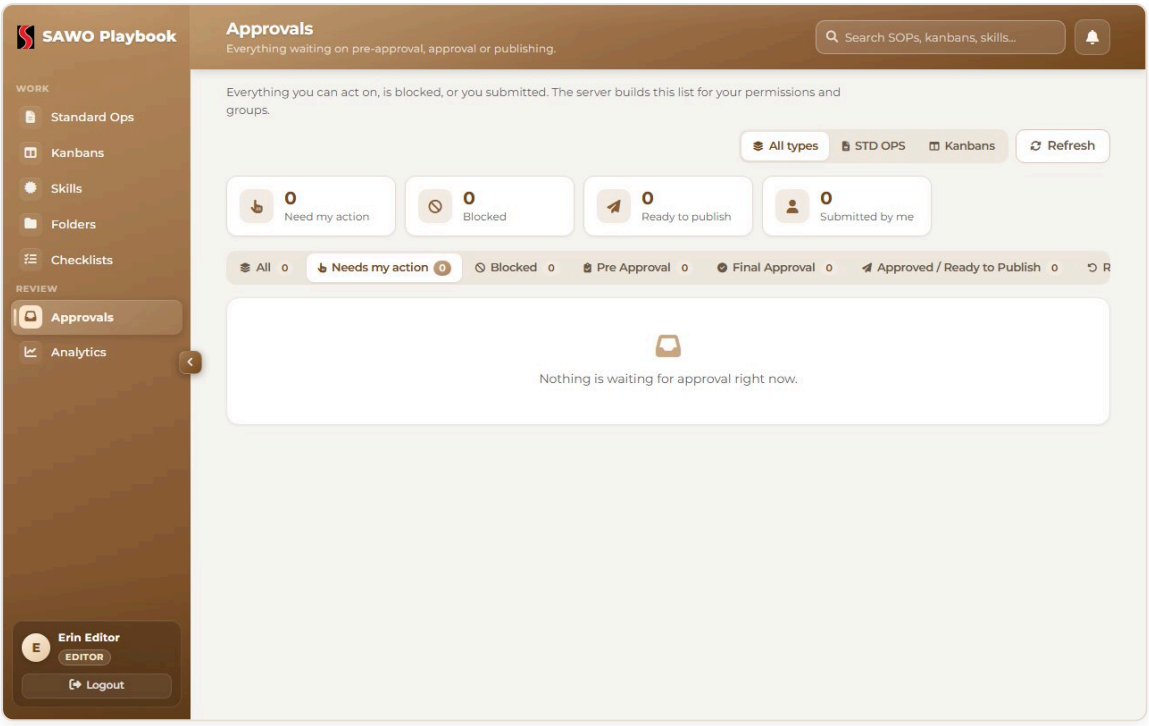

Figure 41. Everything has been published.

7 Skills & training records

The Skills page is a training matrix: one row per person and one column per published SOP.

Each cell shows a person's competency level on an SOP:

LEVEL	MEANING
0	No Training
1	Knows Basic Principles
2	Demonstrates Basic Principles
3	Able to Work Alone
4	Able to Train Others

Record training

You can record training for the operators your Admin has assigned to you as their trainer.

1. On the Skills page, click the person's cell under the SOP. Or, on Standard Ops, open the SOP card menu (**...**) and choose **Update Training Record**.
2. Choose the **Associate** and the **Competency level**, and add **Notes** if useful.
3. Click Save.

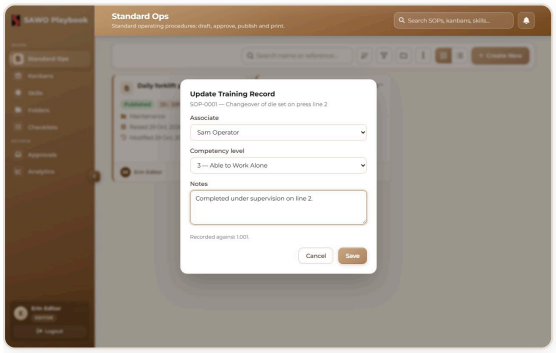

Figure 42. Update Training Record.

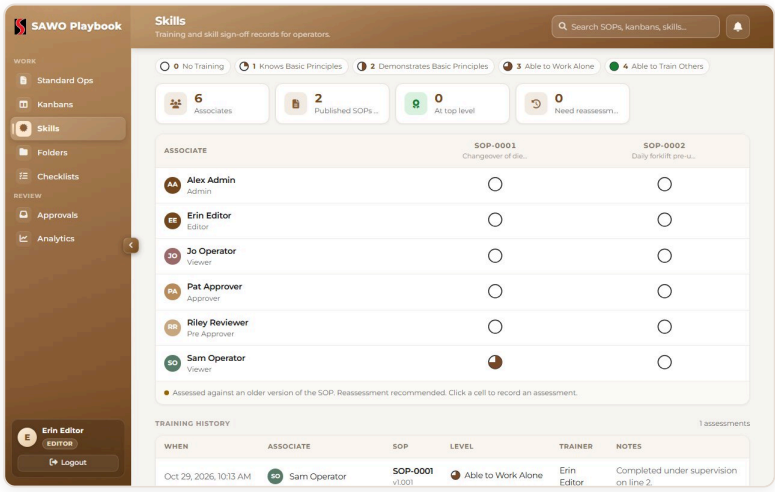

Figure 43. The skills matrix and training history.

> **Reassessment**
> Training is recorded against the SOP's published version. When a new version is published, a small dot marks people assessed on an older version. They should be reassessed. The **Need reassessment** tile counts them.

8 Analytics

Analytics shows **your activity**: SOPs published, drafts in review, kanban cards and checklists completed, plus a daily activity chart, your most viewed SOPs and a list of events. Use the period buttons (7 days, 30 days, 90 days, 12 months) to change the time range.

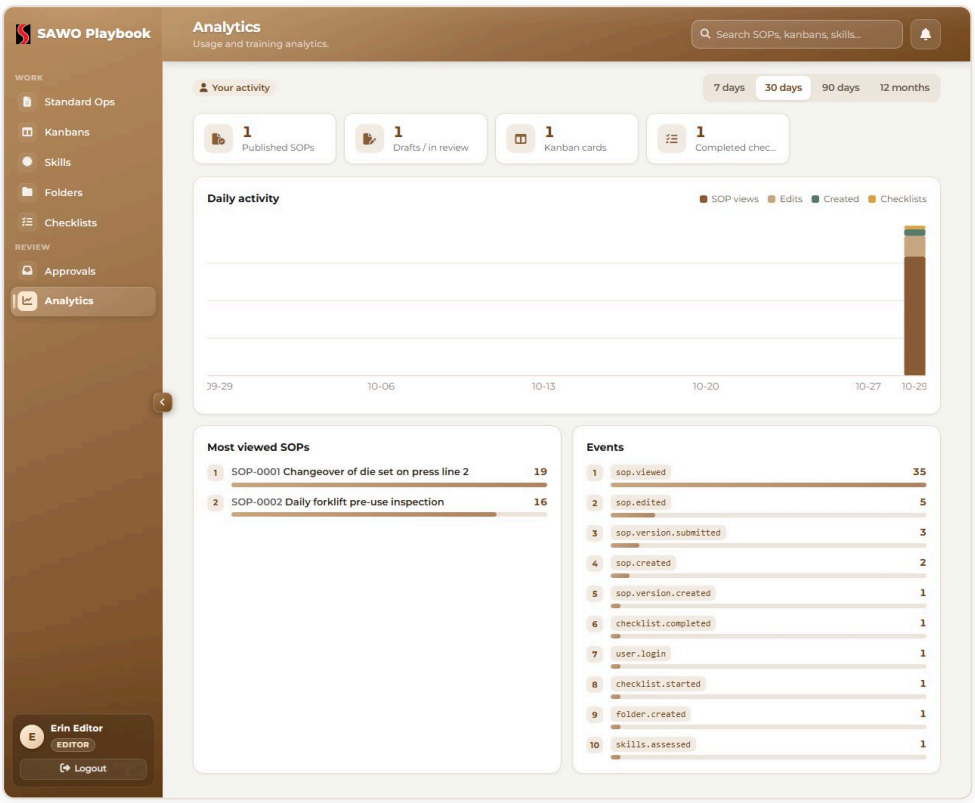

Figure 44. Analytics.

9 Search

Type in the **global search box** in the header (*Search SOPs, kanbans, skills...*) and press `Enter`. Results are grouped into procedures and kanban cards. It searches names, reference numbers and the text of SOPs.

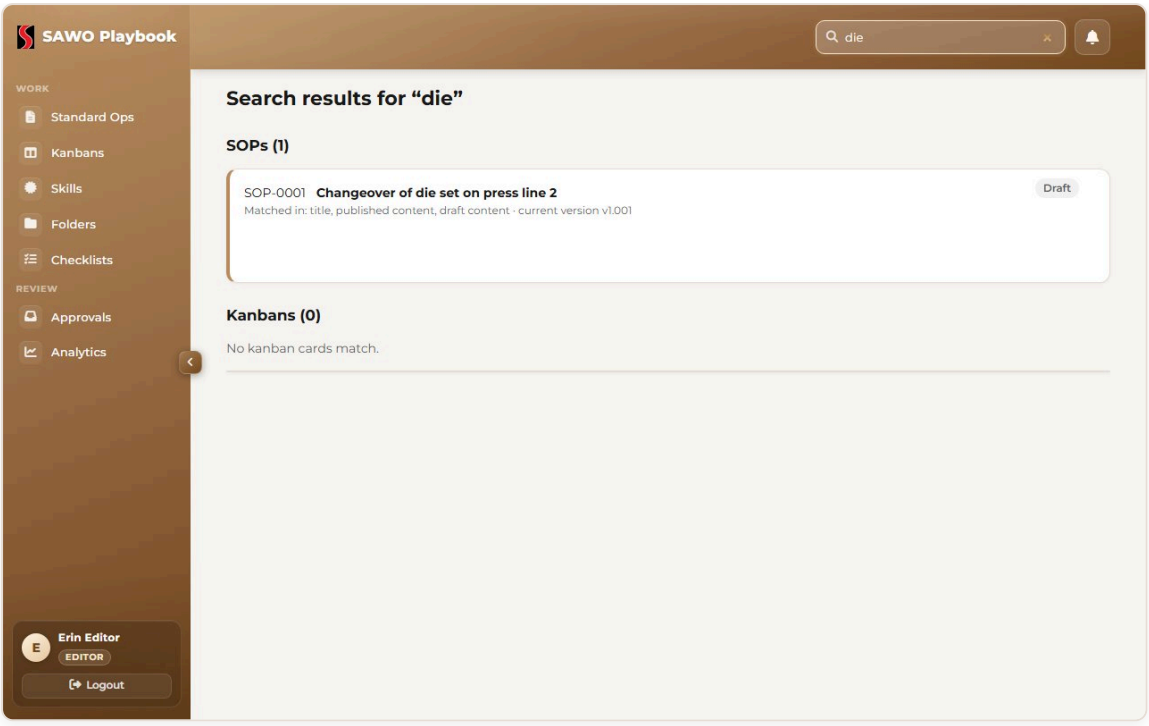

Figure 45. Search results for "die".

10 Your profile, password & 2FA

Click your name at the bottom of the sidebar to open **My profile**.

- **Details**: change the name other people see on SOPs, approvals and checklists, then click **Save details**.
- **Change password**: enter your current password and a new one (at least 10 characters). This signs you out on your other devices.
- **Two-factor authentication**: click **Set up two-factor**, scan the QR code with an authenticator app (Google Authenticator, Microsoft Authenticator, 1Password…) and enter the 6-digit code. From then on you'll be asked for a code at every sign-in.

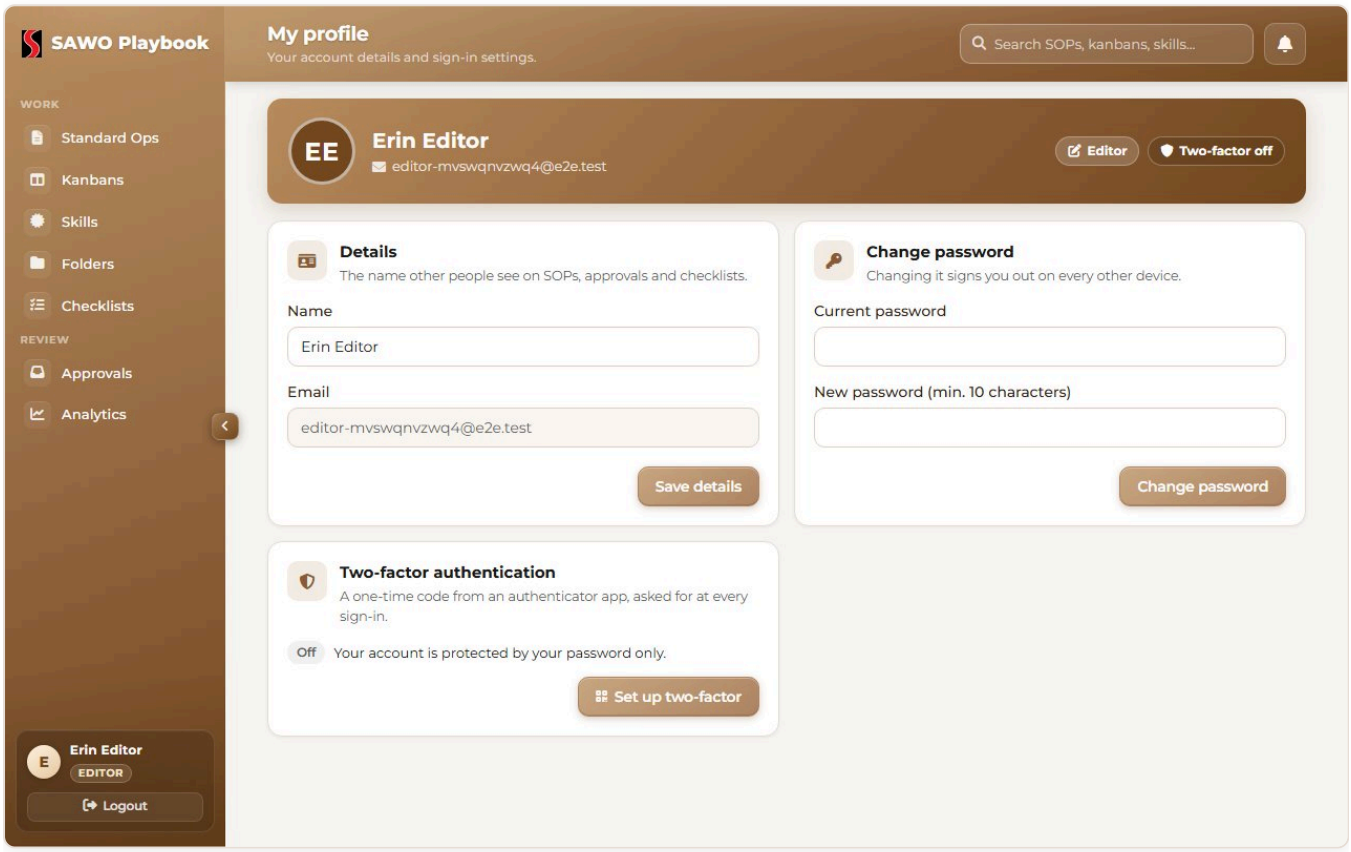

Figure 46. My profile.

Signing out

Click **Logout** at the bottom of the sidebar, especially on shared computers.

11 Troubleshooting & FAQ

QUESTION	ANSWER
I can't find the new kanban card I just saved.	New cards only appear on the Kanbans page after they're published. Find the draft under **Approvals** → **Mine** and submit it (5.2).
My SOP says **Blocked**.	Nobody in your group can pre-approve or approve it. Admins are notified automatically, but tell your Admin too.
Why can't I approve my own SOP?	Someone else must check your work. You'll see *You submitted this version, so you cannot approve it.*
The **Edit** button is greyed out.	A change is already in review. Wait until it's approved or rejected, or ask the reviewer.
I don't see a button or menu item shown in this guide.	Your Admin may have changed what Editors can do, or hidden a menu item. Ask your Admin.
The PDF looks out of date.	Click *Issue with PDF? Click to regenerate* under the View or Print Options.
The step description shows a warning.	Descriptions longer than about 400 characters may not fit well in some PDF layouts. Shorten the text or split the step.
I can't record training for someone.	You can only assess people your Admin has assigned to you, and only on published SOPs.
I was signed out unexpectedly.	Your session expires after a period of inactivity, or when your password or role changes. Sign in again.

12 Quick reference

New SOP
Standard Ops → + Create New → name → Create → add steps → Finish & Submit

Change a published SOP
Open SOP → Edit → change → Change summary → Finish & Submit

Fix a rejected SOP
Approvals → Rejected → open → Edit draft → fix → Finish & Submit

Print / QR
Open SOP → View or Print PDF / View or Print QR Code

New kanban card
Kanbans → + Create New → fill in → Save draft → Approvals → Mine → Open → Submit for review

Change a kanban card
